Trip Report

The spectacular Green Peafowl by Glen Valentine

Tour Leaders: Glen Valentine & Uthai Treesucon Trip Report compiled by Glen Valentine

Tour Summary

Female Amur Falcon in Khao Yai NP

Our Highlights trip of Thailand takes in the must-visit, key birding sites of Kaeng Krachan, Khao Yai and Doi Inthanon National Parks, as well as the vast, coastal wetlands of Pak Thale and Laem Pak Bia to the south of Bangkok. The number of species seen during this quick-fire birding tour around Thailand is truly astounding! There is nowhere else in Asia where one can encounter as many species in such a short period of time. The superb birding coupled with delicious food, good accommodation, excellent vehicles and drivers and extremely friendly and hospitable people make Thailand a birding destination like few others.

There were indeed a wealth of serious birding highlights on this tour, and these included the likes of the critically endangered Spoon-billed Sandpiper, Nordmann's Greenshank, Asian Dowitcher, the rarely-seen Chinese Egret, the unique and bizarre Ratchet-tailed Treepie, Blackheaded and Bamboo Woodpeckers, the spectacular Silver Pheasant, Siamese Fireback, Orange-breasted Trogon, Green Peafowl, Collared and Black-thighed Falconets, a female Amur Falcon, the seldom-recorded Rain Quail, Blossom-headed Parakeet, Black-and-red and Dusky

Broadbills, Blue Pitta, the brilliant Sultan Tit, rare and localised White-headed Bulbul, Slaty-bellied Tesia, Grey-headed Parrotbill, Black-backed Forktail, the scarce and elusive Yellow-bellied Flowerpecker and the exquisite Mrs. Gould's Sunbird, to mention just a few. This was our adventure...

An excited group of birders and seasoned travellers gathered in the foyer of our Bangkok hotel and with the bags all loaded up into our two awaiting vans, we met our friendly drivers, piled into the vehicles and struck out at first light for the world-famous birding locality of Pak Thale to the south of Bangkok. After a two hour drive across Bangkok and through Phetchaburi, we arrived at the extensive and teeming

coastal wetlands where we'd spend the remainder of the morning. Soon after arriving, we were admiring hordes of Great Knot and Broad-billed Sandpipers, as well as smaller numbers of Lesser and Greater Sand Plovers, Red-necked and Temminck's Stint and Curlew Sandpipers, along with the occasional Dunlin. Suddenly, the excitement levels rose even higher when the calls of Spoon-billed Sandpiper pierced the air! There, amongst the numerous Red-necked Stints, was a single Spoonbill. However, it did not stick around very long as something, probably a raptor of sorts, startled the entire flock of waders and we lost sight of this mega wader as it disappeared out of sight. Fortunately, we were able to find another

The rare and elusive Grey-headed Parrotbill

individual a short while later and this particular bird stayed around for ages and allowed us to admire it at length through the scopes, until we were completely and utterly satisfied with the views of this serious

The brilliant Mrs. Gould's Sunbird, always a trip highlight

rarity. Continuing our birding of the area, we were delighted to find two Slender-billed Gulls – a bit of a rarity for Thailand, as well as Little and Indian Cormorants, Bar-tailed and Black-tailed Godwits, Spotted and Common Redshanks, Long-toed Stint, Red-necked Phalarope and White-winged Tern. After lunch, we journeyed out to the nearby Laem Pak Bia and our boat trip here yielded three of the rare and seldom-seen Chinese Egret, as well as other great birds like Collared and Black-capped Kingfishers and the range-restricted Malaysian Plover. Back in the late afternoon at the Pak Thale ponds, we found many of the already-mentioned species, along

with a pair of Golden-bellied Gerygone, Great and Pied Mynas, a lovely flock of White-shouldered Starlings and finally, four of the highly sought-after and extremely scarce Asian Dowitcher. What a superb first day's birding! In the late afternoon, we departed the Phetchaburi area and continued the drive south-west towards the extensive lowland and mid-altitude forests of Kaeng Krachan, our base for the next three nights.

Our time in Kaeng Krachan National Park was extremely rewarding, and the lowlands especially rewarded us with some of the best forest birding of the entire trip. We concentrated our efforts on the upper, middle and lower elevations of the reserve and despite the high volumes of foot and vehicle traffic, we still managed to see an amazing suite of gorgeous south-east Asian birds. The higher elevations yielded the very special Ratchet-tailed Treepie, Blyth's Shrike-babbler, Flavescent, Ochraceous and Buff-vented Bulbuls, Chestnut-flanked White-eye, Dark-sided, Hill Blue and Verditer Flycatchers,

Greater Green Leafbird, Yellow-vented and Plain Flowerpeckers, Black-throated Sunbird and the zippy Streaked Spiderhunter; while a huge mixed species flock that we encountered in the mid-morning produced Speckled and White-browed Piculets, Great Iora, Greyheaded Canary-flycatcher, the bamboodwelling Yellow-bellied Warbler, Alstrom's Warbler, White-browed Scimitar Babbler, Golden Babbler, Brown-cheeked Fulvetta and a furtive family group of Collared Babbler. One of the trip highlights came when three Yellowthroated Martens were found sprawled out along the mossy limbs of a large forest tree at the highest point of the reserve. Fantastic!

Yellow-throated Marten in Kaeng Krachan NP

In the mid elevations, we sought out a calling Square-tailed Drongo-Cuckoo and also managed to track down the rare Bamboo Woodpecker, as well as

Blyth's Shrike-Babbler

Puff-throated and Rufous-fronted Babblers, Barwinged Flycatcher-shrike, a beautiful male Scarlet-backed Flowerpecker and Pin-striped Tit-Babbler. The small, seasonal ponds and pans along the entrance road gave us White-throated and Black-capped Kingfishers, the shy and scarce Black Bittern, Chinese Pond Heron and White-breasted Waterhen; while Crested Honey Buzzard and Crested Goshawk were also seen in this area.

A full morning and late afternoon were spent in the highly productive lowlands of the reserve, and here we were treated to the finest and birdiest sessions of birding of the entire trip! Highlights were plentiful, and included specialities and eyecatching target species such as Thick-billed Green

Pigeon, Green-billed Malkoha, Banded Bay Cuckoo, Grey-rumped Treeswift, Germain's Swiftlets in flight overhead, Blue-bearded and Chestnut-headed Bee-eaters, small, noisy flocks of Oriental Pied Hornbills, the immaculate Green-eared, Blue-throated and Blue-eared Barbets, Common and Greater Flamebacks, the sought-after Black-thighed Falconet, the tiny, fast-flying Vernal Hanging Parrot, Ashy Woodswallow, Black-winged Cuckooshrike, the bright red and glossy-black Scarlet Minivet, Black-naped Oriole, Bronzed, Hair-crested and the spectacular Greater Racket-tailed Drongos, the magnificent Sultan Tit, Black-headed, Black-crested, Stripe-throated and Streak-eared Bulbuls, Dark-necked Tailorbird, the dazzling Asian Fairy-bluebird, Common Hill Myna, melodious White-rumped Shama, Asian Brown and Taiga Flycatchers, Blue-winged Leafbird, the brilliant Ruby-cheeked, Olive-backed and Crimson Sunbirds, the striking Black-and-red Broadbill and an unexpected bonus in the form of a Yellow-eared Spiderhunter that showed remarkably well for an extended period while enjoying tea and coffee in the field along with some local Thai treats. In the evening, we managed to track down, with the razor-sharp eyesight of Uthai, a calling Collared Scops Owl back at our accommodation nearby the park.

Departing the bird-rich wonderland of Kaeng Krachan, we began the drive to our next destination - the famous Khao Yai National Park, but not before a short, pre and post breakfast birding stint in the

grassland and scrub adjoining our accommodation. Our pre-dawn walk in this area turned up the scarce Indian Nightjar, as well as an Indian Stone-curlew, while our post-breakfast session yielded at least four Indochinese Bush Larks, a Purple Heron, Zebra Dove and Red Turtle Doves, Grey-breasted and Plain Prinias and Oriental Magpie-Robin.

Later in the morning, we returned to the Pak Thale area on our final quest to find the rare and endangered Nordmann's Greenshank, and this time we came up trumps, with three birds amongst the hundreds of Great Knots that were present in one particular area. We also saw many of the same species that were seen on the first visit to this area,

White-crested Laughingthrush

but we did also manage to obtain views of a Racket-tailed Treepie, as well as a flock of around fifty Pied Avocets – a scarce and erratic species in Thailand. A short visit to the nearby wetlands of Ban Bang Ta Boon turned up a few new and noteworthy species like Western Osprey, Black and Brahminy Kites,

The magnificent Great Hornbill

Painted Stork, Asian Openbill, Yellow-bellied Prinia and some distant Northern Pintail, Eurasian Teal, Garganey and Eurasian Wigeon. After another delicious lunch in a nearby town, we continued the drive towards Khao Yai. A broadcasting of "The Big Year" passed the time rather pleasantly and by dusk, we'd arrived at our hotel near the entrance to the national park.

The birding at Khao Yai proved challenging at times, but we still managed to encounter most of the reserve's special species. We birded both the higher and lower elevation forest during our time here. These varied elevations gave us two sightings of Silver Pheasant, as well as several stunning Orange-breasted Trogons, Mountain Imperial Pigeon, the localised Moustached Barbet, the impressive Great Hornbill, Himalayan Swiftlet, nesting Vernal Hanging Parrots, hordes of Asian Fairy-bluebirds around fruiting trees, the resident, yellow-billed race of Blue Whistling Thrush, Abbott's Babbler, a female Blue Rock Thrush and Grey Wagtail; while mixed species flocks yielded the scarce Heart-spotted Woodpecker, Large Woodshrike, several sizable flocks of

Swinhoe's Minivet, White-bellied Erpornis, Puff-throated and Grey-eyed Bulbuls, Sulphur-breasted Warbler, the very attractive and charismatic White-crested Laughingthrush, Oriental White-eye, Hainan Blue and Verditer Flycatchers, Fire-breasted Flowerpecker, Little Spiderhunter, the vibrant Sultan Tit and numerous Claudia's Leaf Warblers. A short birding stop in an open grassy area produced Brown Shrike, Golden-headed Cisticola and Red-wattled Lapwing and we also managed to track down the vagrant female Amur Falcon that had recently pitched up and was hanging around in one specific area close to the park headquarters. A major surprise and trip highlight!

On our final afternoon, we walked a portion of one of the lower elevation trails and here we added several of Khao Yai's best birds that included a pair of Blue Pitta, the superb Siamese Fireback, three Common Green Magpies, a very handsome adult Rufousbellied Hawk-Eagle and a family group of Dusky Broadbill. Khao Yai also turned up several other noteworthy raptor species, like Changeable Hawk-Eagle, Crested Serpent Eagle and Black Eagle; while our nocturnal forays produced a wonderful, calling Collared Owlet, a beautiful, perched Brown Hawk-Owl and two fly-over Great Eared Nightjars at dusk.

Male Hainan Blue-flycatcher

Departing Khao Yai, we stopped in the early morning at a patch of woodland-edge right in the middle of town. The quantity and quality of birds seen here within twenty minutes was quite staggering indeed! We added several new species that were all scoped and showed superbly well. These included the main

Spectacled Barwing

target here: the gorgeous and noisy Red-breasted Parakeet, as well as perched Coppersmith and Lineated Barbets, a vociferous male Asian Koel, a perched adult Shikra and a flock of Chestnut-tailed Starlings, amongst many other species already encountered by this stage of the trip. Thereafter, we made a short stop in at a nearby wetland. We initially birded the surrounding grassland and scrub here and found Greater Coucal, Oriental Skylark, Zitting Cisticola, Common Tailorbird, Plainbacked Sparrow, Siberian Stonechat, Paddyfield, Richard's and Olive-backed Pipits, Scaly-breasted Munia and an exceptional surprise in the form of three Rain Quails that flew up from under our feet and showed well as they buzzed away into the dense grassland. The wetland and edge held Common and Pin-tailed Snipes, a Yellow Bittern and several Eastern Yellow Wagtails; while Red-rumped Swallows entertained us overhead.

Our next stop of the morning was a temple area en route to Bangkok, where we quickly found and obtained excellent views of the extremely localised and habitat-specific Limestone Wren-Babbler. After a noodle lunch at the edge of the city, we quickly popped into another temple area close to the airport at

the edge of the vast Rangsit Marsh and here we were delighted to find Spotted Owlet, Blue-tailed Beeeater, Malaysian Pied Fantail and a flock of Small Minivet before boarding our domestic flight to Chiang Mai, situated in north-western Thailand, and the gateway to the country's various forested and bird-rich mountains that bridge the border with Burma. This evening, some of us opted to visit the nearby Chiang Mai night market that hummed with tourists and tiny stalls selling various trinkets and handicraft items, as well as more day-to-day items like flip-flops (thongs, for the Ozzies!) and sunglasses. After a long but

rewarding day, we returned to our rather luxurious hotel for a well-deserved night's rest in preparation for the next leg of the trip.

After an early breakfast, we reunited with our wonderful drivers and struck out for some early morning birding at the nearby King's Project (Huai Hong Krai), where our main target species was the spectacular and rare Green Peafowl. Shortly after arriving, we were in business when four of these stunning pheasants flew across a clearing right in front of us, showing their brilliant, emerald flight feathers before diving into the dense forest understorey, not to be seen again during the course of the morning. Ecstatic with our success, we continued birding the area and

Rufous-bellied Hawk-Eagle in Khao Yai NP

managed to find several other notable species, such as Black Baza, Asian Barred Owlet, Brown-backed Needletail, a rather fleeting pair of Rosy Minivet, Golden-fronted Leafbird and Tickell's Blue Flycatcher. We left the forest and ponds of Huai Hong Krai in the mid-morning and began the drive south towards Doi Inthanon. En route we made a short coffee and tea stop that gave us a pair of Brown-throated Sunbird

The stunning Yellow-cheeked Tit

in a flowering tree, and after negotiating some heavy traffic, we finally arrived at the Doi Lor rice-fields where we spent a short while scanning and birding the paddyfield edges. This proved rather worthwhile as we encountered several new and noteworthy species, the most interesting being three Booted Eagles, Blackwinged Kite, Common Kestrel, Sooty-headed Bulbul, Grey-breasted Prinia, Pied Bush Chat and White Wagtail. Thereafter, we continued the drive and arrived at our comfortable and well-appointed accommodations near the entrance to Doi Inthanon National Park in perfect time for a delicious Pad-Thai lunch, before heading into the reserve for the remainder of the afternoon.

The park was packed with local tourists and birding along the main road proved a bit of a challenge, although extremely birdy! We only had a short time to bird before dusk would arrive and we'd have to leave the park, but we sure made the most of our time here and managed to find a wealth of exciting and eye-catching species. These included the striking Yellow-cheeked Tit, Flavescent, Mountain and Black Bulbuls, highly-active Two-barred and Davison's Leaf Warblers, Yunnan Fulvetta, the extremely shy and furtive White-necked Laughingthrush, rather skulking Hill Prinia, Dark-backed Sibia, Orange-bellied Leafbird, a male Eyebrowed Thrush, Cook's Swift and large numbers of Asian House Martins.

Our itinerary allowed us three full days to search for and soak in the mountain's wonderful avifauna, and during the course of our time here, we were able to cover most of the mountain's unique and diverse

habitats and elevations, thereby allowing us to find a huge number of Doi Inthanon's most prized birds. The lower altitude, semi-deciduous, broad-leaved, dipterocarp woodland yielded the handsome, range-restricted and generally scarce Black-headed Woodpecker, as well as the huge White-bellied Woodpecker, and an incredible group of ten Collared Falconets, all perched up in one tree!

The beautiful, mid-altitude, broad-leaved evergreen forest was a major zone of focus for us, and our time spent in this marvellous habitat produced many of our best sightings and species of the entire trip. Most notable were several Golden-throated Barbets,

A group of Collared Falconets (7 in this picture and 10 in the tree!) in the lower elevations of Doi Inthanon

Grey-chinned, Long-tailed and Short-billed Minivets, a superb male Asian Emerald Cuckoo, Blyth's Shrike-Babbler, a female Maroon Oriole, the flashy Lesser Racket-tailed Drongo, White-throated and Yellow-bellied Fantails, Mountain Tailorbird, the minuscule Slaty-bellied Tesia, Pygmy Wren-babbler,

The smart White-capped Redstart

Bianchi's, Martens's and Chestnut-crowned Warblers, a shy but highly responsive Rustycheeked Scimitar Babbler, a pair of the shy Eyebrowed Wren-Babbler, Blue-winged Minla, the smart Spectacled Barwing, a flock of the rare and elusive Grey-headed Parrotbill, the aptlynamed Velvet-fronted Nuthatch, White-gorgeted, Little Pied and Pale Blue Flycatchers, Hume's Treecreeper and a pair of the stunning-blue Large Niltava.

In the mid-altitude mixed pine and broad-leaved woodland, grassland and scrub, we added Greycapped Pygmy Woodpecker, Eurasian Jay, the localised, scarce and very attractive Whiteheaded Bulbul, Japanese and Cinereous Tits,

Chestnut-vented Nuthatch, Slaty-blue Flycatcher, Buff-throated Warbler and Grey Bush Chat; while a lunch stop at Mr Daeng's yielded the migratory, black-billed race of Blue Whistling Thrush, as well as a particularly confiding White-browed Shortwing and a female Siberian Blue Robin. The numerous picturesque waterfalls and rivers on the mountain also yielded a number of new, exciting and classically Asian species, such as Black-backed and Slaty-backed Forktails and White-capped and Plumbeous Water Redstarts.

On our final morning in the national park, we ventured up to the top of the mountain and spent the morning exploring the road-edge and sphagnum bog, where we found a number of spectacular species like the scarce and erratic Speckled Wood Pigeon, attractive flocks of Wedge-tailed Green Pigeon, a female Yellow-bellied Flowerpecker, Slaty-backed Flycatcher, Rufous-winged Fulvetta, Silver-eared Laughingthrush, Bar-throated Minla, the exquisite Mrs. Gould's and Green-tailed Sunbirds, White-

crowned Forktail, a female Chestnut-bellied Rock Thrush and Blyth's Leaf Warbler, to name just a few of the most exciting species seen in this area. Our night-time excursions around and close to our accommodations produced another fantastic sighting of Collared Scops Owl, as well as another close-flying Indian Nightjar for those that missed them earlier around Kaeng Krachan.

On our final morning, we visited Mr Tii's - a large canopy tower that rises up above the surrounding dipterocarp woodland and is most famous as a reliable site to see the rare and beautiful Blossom-headed Parakeet. We succeeded in finding at least ten of these gorgeous little parrots and also encountered a range of other

Silver-eared Laughingthrush at the top of Doi Inthanon

great birds: Red-billed Blue Magpies flopped around from tree to tree, Crested Honey Buzzards and a Eurasian Sparrowhawk passed by overhead, Green Bee-eaters hawked insects from the tops of bushes, a party of four Common Woodshrikes, Lineated Barbet, the stunning Purple Sunbird and several Red-whiskered Bulbuls foraged close-by; while the beautiful Black-hooded Oriole also made an appearance. Striated Swallows hawked insects on the wing and a nearby field hosted four Black-collared Starlings,

Bar-throated (Chestnut-tailed) Minla

but the absolute show-stopper was undoubtedly a flock of thirteen Green Peafowl that fed unperturbed in a grassy clearing at the forest edge and included an immaculate adult male in spectacular, impeccable plumage!

Alas, it was time to bid the bird-rich and vibrant Thailand goodbye as we made our way back to Chiang Mai to connect with our flight back to Bangkok and our international flights back home.

Thank you to everyone, from Uthai and our superb drivers to the wonderful participants who all helped make this Highlights tour of Thailand so memorable and successful.

ANNOTATED LIST OF BIRDS RECORDED (385 species recorded (356 seen and 29 heard only))

Nomenclature and taxonomy follows the IOC List 6.4. Please cite: Gill, F. and M. Wright. 2016. Birds of the World: Recommended English Names. Princeton NJ: Princeton University Press. Names in round brackets represent alternative names for the species. A notes section is included where recent taxonomical changes have taken place.

Key to abbreviations:

(H) = Heard only; (I) = Introduced; NP = National Park; (CR) = Critically endangered; (EN) = Endangered; (VU) = Vulnerable; (NT) = Near Threatened; (NE) = Near-endemic

Swans, Geese & Ducks Anatidae

Northern Pintail

Anas acuta

Around a hundred birds were seen at the Ban Bang Ta Boon wetlands.

Eurasian Wigeon

Anus penelope

Several seen at Ban Bang Ta Boon wetlands.

Eurasian (Common) Teal

Anas crecca

A few seen at Ban Bang Ta Boon wetlands.

 $NOTE: Sometimes\ split\ into\ two\ species:\ Eurasian\ Teal\ and\ Green-winged\ Teal.$

Garganey Anas querquedula

At least 6 seen at Ban Bang Ta Boon wetlands.

Pheasants & Partridges Phasianidae

Rufous-throated Partridge (H)

Arborophila rufogularis

A leader-only sighting along the boardwalk trail on top of Doi Inthanon. Several heard in the area.

Bar-backed Partridge

Arborophila brunneopectus

A pair seen very briefly next to the road half way up Doi Inthanon.

Green-legged (Bar-breasted) Partridge (H)

Arborophila chloropus

We heard this species at Kaeng Krachan and Khao Yai NPs.

Rain Quail

Coturnix coromandelica

A total of 4 birds flushed in grassland surrounding the wetland near Khao Yai NP. A major surprise!

Red Junglefowl (H)

Gallus gallus

Strangely this species was only heard in Khao Yai and Doi Inthanon NPs.

Silver Pheasant Lophura nycthemera

Two separate encounters of males and females were had near the top of Khao Yai. **Siamese Fireback****Lophura diardi*

A pair showed well but briefly along a trail in Khao Yai NP.

Grey Peacock-Pheasant (H)

Polyplectron bicalcaratum

A leader-only sighting with several birds calling in Kaeng Krachan NP.

NOTE: IOC now recognizes two species: Grey Peacock-Pheasant and Hainan Peacock-Pheasant.

Green Peafowl (EN)

Pavo muticus

This was another trip highlight. We had very good views of four birds in flight at Huai Hong Khrai with another 13 that included a stunning adult male at Mr Tii's tower near Doi Inthanon NP.

Grebes Podicipedidae

Little Grebe (Dabchick)

Tachybaptus ruficollis

Several seen at various small wetlands.

NOTE: IOC recognizes two species: Little Grebe and Tricolored Grebe.

Storks Ciconidae

Painted Stork (NT)

Mycteria leucocephala

These handsome birds were seen around Ban Pak Bia and at Ban Bang Ta Boon wetlands.

Asian Openbill

Anastomus oscitans

We had many sightings especially in the rice fields around Bangkok. Recorded on three dates.

Ibis, Spoonbills Threskiorithidae

Black-headed Ibis

Threskiornis melanocephalus

Around 4 of these birds were seen at the Ban Bang Ta Boon wetlands.

Herons, Egrets & Bitterns Ardeidae

Yellow Bittern

Ixobrychus sinensis

Heard near our hotel at Kaeng Krachan and then seen well in flight and perched at the wetland near Khao Yai NP.

Black Bittern

Dupetor flavicollis

A single bird was flushed from a small pond in Kaeng Krachan NP.

Black-crowned Night Heron

Nycticorax nycticorax

One bird seen at Lam Pak Bia.

Striated (Green-backed) Heron

Butorides striatus

Seen at Lam Pak Bia.

NOTE: Three species now exist: Straited, Green and Lava Herons.

Chinese Pond Heron

Ardeola bacchus

In non-breeding (winter) plumage these birds are almost impossible to identify from the next species. Some experts say that this species has dark edges to the wing tips and frequents forest pools and rivers whereas Javan Pond Heron has all pale wings and occurs in open rice paddy and wetland environments during winter. This is however very debatable and yet to be proven. If this is the case we then saw good numbers daily at scattered sites throughout Thailand.

Javan Pond Heron

Ardeola speciosa

If wing tips and habitat are good features to identify this and the latter species we would then have seen this species in rice fields and open wetland environments around Ban Pak Bia. Both species are common throughout Thailand when in breeding plumage and easily identified so it is almost inevitable that we encountered both species during our time in the country.

Eastern Cattle Egret

Bubulcus coromanda

A cosmopolitan species encountered at many sites.

NOTE: IOC recognizes two species: Eastern Cattle Egret and Western Cattle Egret.

Grev Heron

Ardea cinerea

Small numbers found at scattered wetlands.

Purple Heron Ardea purpurea

Two seen near our hotel at Kaeng Krachan.

(Eastern) Great Egret Ardea alba

Frequently recorded.

NOTE: Two species are sometimes recognized: Eastern Great Egret and Western Great Egret.

Intermediate (Yellow-billed) Egret *Egretta intermedia*

A total of three seen.

Little Egret *Egretta garzetta*

Commonly seen.

NOTE: Two species are usually recognized: Little Egret and Dimorphic Egret.

Pacific Reef Heron (Egret)

Egretta sacra

Two dark morph birds were seen at Lam Pak Bia.

Chinese Egret (VU) Egretta eulophotes

Excellent views were enjoyed of three separate birds during our boat trip out to Lam Pak Bia.

Cormorants Phalacrocoracidae

Little Cormorant

Microcarbo niger

Many birds were seen at Ban Pak Thale and Lam Pak Bia, with more at other wetlands.

Indian Cormorant

Phalacrocorax fuscicollis

Small numbers seen at Pak Thale.

Osprey Pandionidae

Western Osprey

Pandion haliaetus

Singletons at Ban Bang Ta Boon and at the wetland near Khao Yai NP.

NOTE: IOC recognizes two species: Eastern Osprey and Western Osprey.

Hawks, Kites, Eagles & Vultures Accipitridae

Black-winged (Black-shouldered) Kite

Elanus caeruleus

Singletons were seen near Khao Yai NP and at Doi Lor paddyfields.

NOTE: Three species are now recognized: Black-winged (Black-shouldered) Kite, White-tailed Kite and Black-shouldered (Australian) Kite.

Crested (Oriental) Honey-buzzard

Pernis ptilorhynchus

This widespread Asian raptor was recorded on four dates.

Jerdon's Baza (H) Aviceda jerdoni

Only heard in Kaeng Krachan NP.

Black Baza Aviceda leuphotes

Good views of two in flight at Huai Hong Krai.

Crested Serpent Eagle Spilornis cheela

This common but attractive raptor was seen at Khao Yai and Huai Hong Krai.

Changeable Hawk-Eagle Niseatus cirrhatus

One brief sighting in Khao Yai NP.

NOTE: Sometimes split into two species: Changeable Hawk-Eagle and Crested Hawk-Eagle.

Rufous-bellied Hawk Eagle

Lophotriorchis kienerii

Excellent flight views of an adult in Khao Yai NP.

Black Eagle Ictinaetus malaiensis

One seen well in flight in Khao Yai NP.

Booted Eagle Hieraaetus pennatus

Three birds (both pale and dark morphs) were seen well in flight at Doi Lor paddyfields.

Crested Goshawk Accipiter trivirgatus

Singletons were seen in Kaeng Krachan and Khao Yai NPs.

Shikra Accipiter badius

Excellent perched views of an adult near the edge of Khao Yai NP.

Besra Accipiter virgatus

Brief flight views were had of two separate birds in Kaeng Krachan NP.

Eurasian Sparrowhawk Accipiter nisus

A female was seen in flight near our hotel at the edge of Doi Inthanon NP.

Black (Black-eared) Kite

Milvus migrans lineatus

Small numbers were seen at several localities on three separate dates.

NOTE: Often split into three species: Black Kite, Yellow-billed Kite and Black-eared Kite. **Brahminy Kite**Haliastur indus

Several birds were seen in the Pak Thale/Laem Pak Bia area.

Rails, Gallinules & Coots Rallidae

White-breasted Waterhen

Amaurornis phoenicurus

Fairly common and widespread and seen on four dates.

Black-tailed Crake (H)

Porzana bicolor

Unfortunately only heard at the small marsh in Doi Inthanon NP.

Common Moorhen Gallinula chloropus

Two seen in Kaeng Krachan NP with another one at Huai Hong Krai.

NOTE: Recently split into two species: Common Moorhen and Common Gallinule.

Thick-knees Burhinidae

Indian Stone-curlew (Thick-knee)

Burhinus indicus

Heard calling and then seen in flight at dawn at the edge of our Kaeng Krachan accommodation.

NOTE: Recently split into two species: Eurasian Stone-curlew and Indian Stone-curlew.

Avocets & Stilts Recurvirostridae

Black-winged Stilt

Himantopus leucocephalus

Large numbers with up to several hundred birds seen at saltpans and wetlands at Baan Pak Thale.

Pied Avocet Recurvivostra avosetta

A flock of around 50 birds was encountered at Pak Thale. A scarce and seldom seen bird in Thailand!

Plovers & Lapwings Charadriidae

Red-wattled LapwingVanellus indicus

Regularly seen throughout the trip.

Pacific Golden-Plover Pluvialis fulva

Fair numbers seen at Pak Thale.

Grey (Black-bellied) Plover Pluvialis squatarola

Large numbers seen at Pak Thale.

Little Ringed PloverCharadrius dubius

A few at Pak Thale.

Kentish PloverCharadrius alexandrinus

Around 20 at Pak Thale.

Malaysian Plover (NT) Charadrius peronii

Excellent views of 8 birds at the sandbar at Laem Pak Bia.

Lesser Sand PloverCharadrius mongolus

Large numbers at Pak Thale.

Greater Sand Plover Charadrius leschenaultii

At least 6 birds identified at Pak Thale.

Jacanas Jacanidae

Bronze-winged Jacana Metopidius indicus

A brief flight view was had of a single bird en route to Pak Thale on the first morning.

Sandpipers & Allies Scolopacidae

Pin-tailed SnipeSingletons were seen near Khao Yai and at Doi Lor.

Common Snipe Gallinago gallinago

First seen near Laem Pak Bia and then again near Khao Yai NP.

Asian Dowitcher (NT)

Limdromus semipalmatus

After a lengthy search, we finally managed to find four of these rare and sought-after waders in the Pak

Thale area.

Black-tailed Godwit (NT)

Limosa limosa

Large numbers seen at Pak Thale.

Bar-tailed Godwit Limosa lapponica

As with the previous species, large numbers seen at Pak Thale.

Whimbrel Numenius phaeopus

One bird found at Pak Thale.

Eurasian Curlew (NT)

Numenius arquata

A massive flock seen in the distance at Pak Thale.

Spotted Redshank Tringa erythrops

Fair numbers seen at Pak Thale.

Common Redshank Tringa erythopus

Around 30 birds seen in the Pak Thale area.

Marsh Sandpiper Tringa stagnatilis

Large numbers seen in the Pak Thale area.

Common Greenshank Tringa nebularia

Large numbers at Pak Thale.

Nordmann's Greenshank (EN)

Tringa guttifer

We found three of these rare and endangered waders upon our return trip to the Pak Thale area.

Green Sandpiper Tringa ochropus

One bird seen in the Pak Thale area.

Wood Sandpiper Tringa glareola

Seen at scattered localities throughout the tour.

Terek Sandpiper Xenus cinereus

A single bird seen well at Pak Thale.

Common SandpiperActitis hypoleucos

Small numbers seen at Pak Thale and Laem Pak Bia.

Great Knot (VU) Calidris canutus

Huge numbers were seen on both visits to Pak Thale.

Sanderling Calidris alba

Fair numbers at Pak Thale and Laem Pak Bia.

Red-necked StintCalidris ruficollis

Large numbers seen in the Pak Thale area.

Temminck's StintCalidris temmincki

A few birds were seen in the Pak Thale area.

Long-toed StintCalidris subminutaTwo of these fairly scarce waders were seen well in the Pak Thale area.Curlew SandpiperCalidris ferruginea

Huge numbers seen at Pak Thale.

Dunlin Calidris alpine

Three birds were found at Pak Thale.

Spoon-billed Sandpiper (CR) *Eurynorhynchus pygmeus*

Two separate birds were found during our morning at Pak Thale. The second individual showed particularly well and for an extended period offering us excellent scope views. A superb little bird and an undoubted highlight of the trip!

Broad-billed SandpiperLimicola falcinellus

Large numbers of this usually scarce wader were seen in the Pak Thale area. **Ruff**Philomachus pugnax

Small numbers seen around Pak Thale.

Red-necked Phalarope Phalaropus lobatus

A total of four birds were seen during our time in the Pak Thale area.

Gulls, Terns & Skimmers Laridae

Slender-billed Gull Chroicocephalus genei

This scarce migrant was seen well at Pak Thale. Two were seen.

Brown-headed Gull Chroicocephalus brunnicephalus

Up to 100 birds were seen around Pak Thale with a few more at Ban Bang Ta Boon wetlands.

Gull-billed Tern Gelochelidon nilotica

Small numbers seen at Pak Thale and Ban Bang Ta Boon.

Caspian Tern

Several birds seen at Pak Thale.

Greater Crested (Swift) Tern Thalasseus bergii

Small numbers around Pak Thale and Laem Pak Bia.

Little Tern Sterna albifrons

Fairly large numbers were seen in the Pak Thale area.

NOTE: Usually split into two species: Little Tern and Saunders's Tern.

Common Tern Sterna hirundo

Fairly common around Pak Thale.

Whiskered Tern Chlidonias hybridus

Fairly large numbers were seen in the Pak Thale area.

White-winged Tern Chlidonias leucopterus

At least 10 birds seen in the Pak Thale area.

Doves & Pigeons Columbidae

Sterna caspia

Rock (Common) Dove (Pigeon) (I) Columba livia

We found this species to be fairly common in towns and cities throughout.

Speckled Wood PigeonColumba hodgsonii

Six birds were seen near the summit of Doi Inthanon NP.

Red Turtle DoveStreptopelia tranquebarica

A common species along the roadsides and found in most of the sites we visited.

Spotted Dove Streptopelia chinensis

Good numbers were seen at most localities.

Barred Cuckoo-Dove (H) *Macropygia unchall*

Heard in Khao Yai NP.

Common (Asian) Emerald Dove Chalcophaps indica

Brief views were had of singletons on three dates.

NOTE: Two species now exist: Common Emerald Dove and Pacific Emerald Dove.

Zebra Dove Geopelia striata

A common species throughout the tour.

Thick-billed Green PigeonTreron curvirostra

Small numbers were seen in Kaeng Krachan and Khao Yai NP's.

Wedge-tailed Green Pigeon Treron sphenurus

Excellent views were had on two dates in Doi Inthanon NP.

Mountain Imperial Pigeon Ducula badia

Three birds seen in Khao Yai NP.

Cuckoos Cuculidae

Greater Coucal Centropus sinensis

This is a widespread species that was seen on four separate dates.

Green-billed MalkohaPhaenicophaeus tristis

Good views were had of several birds in Kaeng Krachan and Khao Yai NPs.

Asian Koel *Eudynamys scolopaceus*

Seen or heard in small numbers at many sites.

Asian Emerald Cuckoo Chrysococcyx maculatus

One male seen very well in Doi Inthanon NP.

Banded Bay Cuckoo Cacomantis sonneratii

Good scope views had in the lower levels of Kaeng Krachan NP.

Plaintive Cuckoo (H) Cacomantis merulinus

Heard near the edge of Rangsit Marsh.

Square-tailed (Asian) Drongo-CuckooExcellent scope views of one calling individual in Kaeng Krachan NP.

NOTE: Recently split into four species but a very dubious split that is not very well known or understood: Square-tailed, Forktailed, Philippine and Moluccan Drongo-Cuckoos.

Typical Owls Strigidae

Collared Scops Owl

Otus lettia

Excellent views of one at our Kaeng Krachan accommodation and at our hotel near Doi Inthanon NP.

NOTE: Recently split into three species: Collared, Indian and Sunda Scops Owls.

Collared Owlet Glaucidium brodiei

Great views of one in Khao Yai NP.

Asian Barred OwletGlaucidium cuculoides

Heard on many occasions and seen very well at Huai Hong Krai. **Spotted Owlet**Athene brama

One seen superbly well at the edge of Rangsit Marsh.

Brown Hawk-Owl (Boobook)

Ninox scutulata

Cracking views of one in Khao Yai NP.

NOTE: Two species now exist: Brown Hawk-Owl and Northern Hawk-Owl.

Nightjars & Allies Caprimulgidae

Great Eared Nightjar

Eurostopodus macrotis

Two fly-overs were had at dusk in Khao Yai NP.

Large-tailed Nightjar

Caprimulgus macrurus

One brief fly-over near the entrance to Kaeng Krachan NP.

Indian Nightjar

Caprimulgus asiaticus

Excellent views were had of individuals near our Kaeng Krachan accommodation and in woodland near Doi Inthanon NP.

Treeswifts Hemiprocnidae

Grey-rumped Treeswift

Hemiprocne longipennis

At least 8 birds were seen in Kaeng Krachan NP.

Swifts Apodidae

Himalayan Swiftlet

Aerodramus brevirostris

Small numbers seen in Khao Yai and Doi Inthanon NPs.

Germain's Swiftlet Aerodromus germani

Large numbers seen in the southern lowlands.

Silver-rumped Spinetail (Needletail)

Rhaphidura leucopygialis

A surprise sighting of one in Khao Yai NP.

Brown-backed Needletail Hirundapus giganteus

A large flock was seen at Huai Hong Krai with another two in Doi Inthanon NP.

Asian Palm Swift Cypsiurus balasiensis

A common species in the lowlands.

Cook's (Fork-tailed) Swift

Apus pacificus

Good views of around a dozen in Doi Inthanon NP.

NOTE: Four species now recognized from the old Fork-tailed Swift: Pacific Swift, Cook's Swift, Blyth's Swift and Salim Ali's

Swift.

House Swift Apus nipalensis

Two seen in Doi Inthanon NP.

Trogons Trogonidae

Orange-breasted Trogon Harpactes oreskios

Superb views of several different birds in Khao Yai NP.

Red-headed Trogon (H)Harpactes erythrocephalus

Heard twice in Khao Yai NP.

Rollers Coraciidae

Indian Roller Coracias benghalensis

A common species seen throughout the trip.

Kingfishers Alcedinidae

Banded Kingfisher (H)Lacedo pulchella

Unfortunately only heard in Khao Yai NP.

White-throated Kingfisher Halcyon smyrnensis

Several seen in and around Kaeng Krachan NP.

Black-capped KingfisherHalcyon pileata

Small numbers seen around Pak Thale and Kaeng Krachan NP.

Collared KingfisherTodirhamphus chloris

Small numbers seen around Laem Pak Bia.

NOTE: Recently split into a staggering number of different species!

Common KingfisherAlcedo atthis

Seen in small numbers on five dates.

Bee-eaters Meropidae

Blue-bearded Bee-eater Nyctyornis athertoni

One seen very well in Kaeng Krachan NP.

Green Bee-eater *Merops orientalis*

Around six seen near Mr Tii's.

NOTE: Sometimes recognized as two separate species: African Green Bee-eater and Asian Green Bee-eater.

Blue-tailed Bee-eaterMerops philippinus
First seen around Pak Thale and again at the edge of Rangsit Marsh.

Chestnut-headed Bee-eater Merops leschenaulti

Small numbers seen in Kaeng Krachan and Khao Yai NP.

Hornbills Bucerotidae

Great Hornbill (NT)

Buceros bicornis

After hearing this species in Kaeng Krachan NP we managed to obtain excellent views of a pair in Khao

Yai NP.

Oriental Pied Hornbill Anthracoceros albirostris

Around a dozen seen in Kaeng Krachan NP with a further sighting in Khao Yai NP.

Barbets Capitonidae

Great Barbet Megalaima virens

Heard on a few occasions with a brief sighting in the upper reaches of Doi Inthanon NP.

Lineated Barbet *Megalaima lineata*

Two seen near Khao Yai NP and again near Doi Inthanon NP.

Green-eared Barbet *Megalaima faiostricta*

Excellent views were had in Kaeng Krachan and Khao Yai NPs.

Golden-throated Barbet *Megalaima franklinii*

Good views of several birds in Doi Inthanon NP.

NOTE: Recently split into two species: Golden-throated and Necklaced Barbets.

Blue-throated Barbet

Megalaima asiatica

One seen in Kaeng Krachan NP and another in Doi Inthanon NP.

NOTE: Recently split into two species: Blue-throated and Turquoise-throated Barbets.

Moustached Barbet

Megalaima incognita

Two in Kaeng Krachan NP and several in Khao Yai NP.

Blue-eared Barbet *Megalaima australis*

Three in Kaeng Krachan NP and a further three in Khao Yai NP. *NOTE: Recently split into two species: Blue-eared and Yellow-eared Barbets*.

Coppersmith Barbet Megalaima haemacephala

First seen near the edge of Khao Yai NP and then again at Huai Hong Krai.

Woodpeckers Picidae

Speckled Piculet Picumnus innominatus

Singletons seen in Kaeng Krachan and Doi Inthanon NPs.

White-browed Piculet Sasia ochracea

We enjoyed an excellent encounter with this species in Kaeng Krachan NP. **Heart-spotted Woodpecker**Hemicircus canente

Superb scope views of one in Khao Yai NP.

Grey-capped Pygmy Woodpecker Dendrocopos canicapillus

Three seen in Doi Inthanon NP.

Stripe-breasted Woodpecker (H)Dendrocopos atratus

Heard in Doi Inthanon NP.

White-bellied Woodpecker Dryocopus javensis

A responsive male was seen briefly perched and in flight in woodland in Doi Inthanon NP.

Greater Yellownape (H) Picus flavinucha

Heard on one occasion in Kaeng Krachan NP.

Laced Woodpecker (H) Picus vittatus

Heard in Khao Yai NP.

Black-headed Woodpecker Picus erythropygius

A spectacular bird! We enjoyed superb scope views of several birds in the foothills of Doi Inthanon NP.

Common Flameback (Goldenback) Dinopium javanense

Great scope looks at two birds in Kaeng Krachan NP.

Greater Flameback (Goldenback) Chrysocolaptes lucidus

A pair was seen very well in Kaeng Krachan NP. *NOTE: Recently split into a number of different species.*

Bamboo Woodpecker Gecinulus viridis

Good flight and brief perched views were had of this scarce bamboo specialty in Kaeng Krachan NP.

Bay Woodpecker (H)Blythipicus pyrrhotis

Heard in Doi Inthanon NP.

Black-and-buff Woodpecker Meiglyptes tristis

Mike and Carol were fortunate to have seen this scarce woodpecker in Khao Yai NP.

Falcons & Caracaras Falconidae

Collared Falconet

Microhierax caerulescens

Incredible views of a group of ten of these tiny raptors in the Dipterocarp woodland in the lower foothills of Doi Inthanon NP.

Black-thighed Falconet

Microhierax fringillarius

Fantastic scope views of three in Kaeng Krachan NP.

Common (Eurasian) Kestrel

Falco tinnunculus

One seen in flight at Doi Lor.

NOTE: Usually split into two species: Rock Kestrel and Common Kestrel.

Amur (Eastern Red-footed) Falcon

Falco amurensis

A real surprise and one of the trip highlights! We were very fortunate to have had lengthy, close views of a sub-adult female in Khao Yai NP.

Parrots, Macaws & Allies Psittacidae

Blossom-headed Parakeet (NT)

Psittacula roseate

Ten birds were seen in flight in the dry woodlands (Mr Tii's) near Doi Inthanon NP.

Red-breasted Parakeet (NT)

Psittacula alexandri

Wonderful views of around twenty birds near the entrance to Khao Yai NP.

Vernal Hanging Parrot

Loriculus vernalis

Excellent views of several birds in Kaeng Krachan and Khao Yai NPs.

Broadbills Eurylaimidae

Black-and-red Broadbill

Cymbirhynchus macrorhynchos

Sensational views of a pair in Kaeng Krachan NP.

Silver-breasted Broadbill (H)

Serilophus lunatus

Unfortunately just heard on one occasion in Doi Inthanon NP.

Dusky Broadbill

Corydon sumatranus

Good scope views were had of this scarce species in Khao Yai NP.

Pittas Pittidae

Blue Pitta

Pitta cyanea

We were very fortunate to let alone hear this species, nevermind see it, albeit briefly, in Khao Yai NP.

Australian Warblers Acanthizidae

Golden-bellied Gerygone

Gerygone sulphurea

Excellent views of a pair in the Pak Thale area.

Woodshrikes and allies Tephrodornithidae

Bar-winged Flycatcher-shrike

Hemipus picatus

Six birds seen in Khao Yai NP.

Large Woodshrike

Tephrodornis virgatus

Good views of three birds in a mixed flock in Khao Yai NP.

NOTE: Now considered two species: Large Woodshrike and Malabar Woodshrike.

Common Woodshrike

Tephrodornis pondicerianus

Four birds seen in dry woodland near Doi Inthanon NP.

NOTE: Now considered two species: Common Woodshrike and Sri Lanka Woodshrike.

Woodswallows *Artamidae*

Ashy Woodswallow

Artamus fuscus

Commonly seen along the roadside in many areas.

Ioras Aegithinidae

Common Iora

Aegithina tiphia

Small numbers were seen in the Kaeng Krachan area.

Great Iora

Aegithina lafresnayei

Several good looks were had in Kaeng Krachan and Khao Yai NPs.

Cuckooshrikes Campephagidae

Black-winged Cuckooshrike

Coracina melaschistos

Singletons and pairs were seen on four dates.

Rosy Minivet

Pericrocotus roseus

A pair showed briefly at Huai Hong Krai.

Swinhoe's (Brown-rumped) Minivet

Pericrocotus cantonensis

Seen regularly in Kaeng Krachan and Khao Yai NPs.

Small Minivet

Pericrocotus cinnamomeus

This smart species showed well at the edge of Rangsit Marsh.

Grey-chinned Minivet

Pericrocotus solaris

Four birds seen in Doi Inthanon NP.

Long-tailed Minivet

Pericrocotus ethologus

Small flocks in Doi Inthanon NP.

Short-billed Minivet

Pericrocotus brevirostris

Four seen in Doi Inthanon NP.

Scarlet Minivet

Pericrocotus flammeus

The most common minivet of the trip and seen in the lowlands and mountains.

NOTE: Recently split into two species: Scarlet Minivet and Orange Minivet.

Shrikes Laniidae

Brown Shrike

Lanius cristatus

A common winter visitor seen on six days of the tour.

Long-tailed Shrike

Lanius schach

One bird seen en route from Doi Inthanon to Chiang Mai.

Vireos, Greenlets Vireonidae

White-bellied Erpornis (Yuhina)

Erpornis zantholeuca

Several birds seen in Khao Yai and Doi Inthanon NP's.

Blyth's (White-browed) Shrike-Babbler

Pteruthius flaviscapis

Excellent views of this vocal species in Kaeng Krachan NP with further sightings on Doi Inthanon. *NOTE: White-browed Shrike-babbler now regarded as four species: Blyth's, Himalayan, Dalat and Pied Shrike-babblers.*

Old World Orioles *Oriolidae*

Black-naped Oriole

Oriolus chinensis

The most commonly encountered oriole that occurs in varied habitats. We saw this species on several

occasions in Kaeng Krachan and Khao Yai NP's.

Black-hooded Oriole

Two birds seen well at Mr Tii's.

Maroon Oriole Oriolus traillii

After hearing this species a few times we finally managed to obtain distant views of a female in Doi Inthanon NP.

Oriolus xanthornus

NOTE: Possibly going to be split soon into Maroon and Red Orioles respectively.

Drongos Dicruridae

Black Drongo Dicrurus macrocercus

Commonly seen in open habitats especially farm and woodlands.

Ashy Drongo Dicrurus leucophaeus

Another common forest species that was seen almost daily.

Bronzed Drongo Dicrurus aeneus

Small numbers seen at most forest sites.

Lesser Racket-tailed Drongo Dicrurus remifer

First seen briefly in Kaeng Krachan NP and then very well on Doi Inthanon.

Hair-crested Drongo Dicrurus hottentottus

Seen commonly at all forest localities.

NOTE: Recently split into several different species and once considered part of the Spangle Drongo complex.

Greater Racket-tailed Drongo Dicrurus paradiseus

This spectacular species was seen a few times in the lower lying forests at most sites.

NOTE: Two species now recognized: Greater Racket-tailed and Sri Lanka Drongos.

Fantails Rhipiduridae

White-throated Fantail Rhipidura albicollis

Four seen in Doi Inthanon NP.

Malaysian Pied Fantail Rhipidura javanica

Small numbers were seen in the lowlands on three dates.

NOTE: Recently split into two species: Malaysian Pied Fantail and Philippine Pied Fantail.

Monarch Flycatchers Monarchidae

Black-naped Monarch *Hypothymis azurea*

Heard several times and seen briefly in the lowlands at Kaeng Krachan NP. **Oriental (Asian) Paradise-Flycatcher (H)**Terpsiphone affinis

Only heard in Kaeng Krachan NP.

NOTE: Asian Paradise Flycatcher recently split into three species: Oriental, Indian and Amur Paradise Flycatchers.

Crows, Jays & Magpies Corvidae

Eurasian Jay Garrulus glandarius

Excellent scope views of one in Doi Inthanon NP.

Red-billed Blue Magpie Urocissa erythrorhyncha

Seen briefly in Doi Inthanon NP and then very well at Mr Tii's.

Common Green Magpie Cissa chinensis

Heard in Kaeng Krachan and then seen in flight in Khao Yai NP.

Racket-tailed Treepie Crypsirina temia

One bird seen well in the Pak Thale area with another brief sighting near Doi Inthanon.

Ratchet-tailed Treepie

Temnurus temnurus

One of Thailand's top birds! We were thrilled to obtain good views of this rarity in the upper reaches of Kaeng Krachan NP.

Eastern Jungle (Large-billed) Crow

Corvus levaillanti

Seen most days.

NOTE: Usually regarded as three species: Large-billed, Eastern Jungle and Indian Jungle Crows respectively.

Fairy Flycatchers Stenostiridae

Yellow-bellied Fantail

Rhipidura hypoxantha

Small numbers seen daily in Doi Inthanon NP.

Grey-headed Canary-Flycatcher

Culicicapa ceylonensis

A fairly common species seen in most forests that we visited.

Chickadees & Tits Paridae

Sultan Tit Melanochlora sultanea

These smart looking birds with funky, yellow crests were seen in Kaeng Krachan and Khao Yai NP's.

Japanese TitParus minor

Small numbers seen in Doi Inthanon NP.

NOTE: Great Tit was recently split into three species: Great Tit, Japanese Tit and Cinereous Tit.

Cinereous Tit Parus cinereus

Two birds seen in Doi Inthanon NP.

NOTE: See above note.

Yellow-cheeked Tit Parus spilonotus

This handsome species was seen daily in Doi Inthanon NP.

Larks Alaudidae

Indochinese Bush Lark

Mirafra erythrocephala

A few birds were seen in the surrounds of our Kaeng Krachan accommodation.

Oriental Skylark

Alauda gulgula

Good views of two birds near Khao Yai NP.

Bulbuls Pycnonotidae

Striated Bulbul (H) *Pycnonotus striatus*

Heard in Khao Yai NP.

Black-headed Bulbul Pycnonotus atriceps

Two seen in Kaeng Krachan NP.

Black-crested Bulbul Pycnonotus melanicterus

Commonly seen throughout.

 $NOTE: Several\ different\ species\ are\ now\ recognized\ from\ the\ original\ Black-crested\ Bulbul.$

Red-whiskered Bulbul Pycnonotus jocosus

Three birds seen in dry woodland near Doi Inthanon.

Sooty-headed Bulbul Pycnonotus aurigaster

Small numbers seen in Khao Yai NP and near Doi Inthanon.

Stripe-throated Bulbul Pycnonotus finlaysoni

First seen in Kaeng Krachan and then later in Khao Yai NP.

Flavescent Bulbul Pycnonotus flavescens

Three in Kaeng Krachan NP with small numbers daily on Doi Inthanon.

Streak-eared Bulbul Pycnonotus blanfordi

Small numbers seen on five dates.

Puff-throated BulbulCriniger pallidus

Seen in small numbers in Khao Yai NP.

Ochraceous Bulbul Criniger ochraceus

Small numbers seen in Kaeng Krachan NP.

Grey-eyed Bulbul Iole propingua

Small numbers were seen in the higher elevations at Khao Yai and again on Doi Inthanon.

Buff-vented Bulbul (NT)Iole olivacea

Three seen well in Kaeng Krachan NP.

Mountain Bulbul Ixos mcclellandii

Small numbers seen daily in Doi Inthanon NP.

Ashy Bulbul Hemixos flavala

Brief views of six in Doi Inthanon NP.

NOTE: Two species are now recognized: Ashy and Cinereous Bulbuls.

Black Bulbul Hypsipetes leucocephalus

Small numbers were seen in Doi Inthanon NP.

NOTE: Recently split into two species: Black Bulbul and Square-tailed Bulbul.

White-headed Bulbul (NE) Cerasophila thompsoni

Excellent views of two of these localised and scarce bulbuls in mid-elevation forest in Doi Inthanon NP.

Another 8 birds were later seen again by some of the group a little higher up.

Swallows Hirundinidae

Barn Swallow Hirundo rustica

Good numbers were seen almost every day throughout the trip.

NOTE: Might soon be split into Old World and New World Barn Swallows respectively.

Dusky Crag MartinPtyonoprogne concolor

Two birds noted on Doi Inthanon.

Asian House MartinDelichon dasypus

Up to forty birds were seen daily in Doi Inthanon NP.

Red-rumped Swallow Cecropis daurica

Good numbers were seen in the Khao Yai and Doi Inthanon areas.

NOTE: IOC recognizes three species: Red-rumped, West African and Sri Lanka Swallows.

Striated Swallow Cecropis striolata

Striated Swallow
Good views of at least ten near Doi Inthanon.

NOTE: Now regarded as two species: Striated and Rufous-bellied Swallows respectively.

Wren-babblers Pnoepygidae

Pygmy (Cupwing) Wren-babbler Pnoepyga pusilla

Two separate sightings were had in Doi Inthanon NP.

Cettia bush Warblers & allies Cettidae

Yellow-bellied WarblerAbroscopus supercilliaris
We had good looks at a pair in bamboo at Kaeng Krachan NP.

Mountain Tailorbird Phyllergates (Orthotomus) cucullatus

Heard on several occasions with a single sighting in Doi Inthanon NP.

Slaty-bellied Tesia Tesia olivea

Excellent views were had of this tiny species in Doi Inthanon NP.

Leaf Warblers & Allies Phylloscopidae

Dusky Warbler

Phylloscopus fuscatus

Heard with brief views of one in Kaeng Krachan NP.

Buff-throated Warbler

Phylloscopus subaffinis

Four birds showed very well in open grassy/pine savanna in Doi Inthanon NP.

Yellow-streaked Warbler (H)

Phylloscopus armandii

Heard in dry woodland near Doi Inthanon.

Radde's Warbler

Phylloscopus schwarzi

Heard and seen briefly in and around Doi Inthanon NP.

Buff-barred Warbler (H)

Phylloscopus pulcher

One bird heard at the summit of Doi Inthanon.

Ashy-throated Warbler

Phylloscopus maculipennis

We had great views of four at the summit of Doi Inthanon NP.

Yellow-browed Warbler

Phylloscopus inornatus

This winter visitor was recorded on most days of the tour.

Hume's Warbler

Phylloscopus humei

Small numbers seen in Doi Inthanon NP.

Two-barred Warbler

Phylloscopus plumbeitarsus

We had good looks at several at most forest reserves.

NOTE: Two species now accepted: Two-barred Warbler and Greenish Warbler.

Pale-legged Leaf Warbler

Phylloscopus tenellipes

Two seen in Kaeng Krachan NP with more heard in Khao Yai NP.

Blyth's Leaf Warbler

Phylloscopus reguloides

At least 15 in Doi Inthanon NP.

NOTE: Three species now accepted: Blyth's, Claudia's and Hartert's Leaf Warblers.

Claudia's Leaf Warbler

Phylloscopus claudiae

Small numbers were had in Khao Yai NP.

NOTE: See above.

Davison's Leaf Warbler

Phylloscopus davisoni

Large numbers seen in Doi Inthanon NP.

NOTE: White-tailed Leaf Warbler now regarded as two species: Davison's and Kloss's Leaf Warblers.

Sulphur-breasted Warbler

Phylloscopus ricketti

This bright yellow and black warbler was seen on four days.

Bianchi's Warbler

Seicercus valentini

One bird seen well in Doi Inthanon NP.

NOTE: The Golden-spectacled Warbler compex has recently been split into 6 different species: Green-crowned, Greycrowned, Whistler's, Bianchi's, Martens's (Omei) and Alstrom's (Plain-tailed) Warblers respectively.

Martens's Warbler

Seicercus omeiensis

Heard and seen in Khao Yai and Doi Inthanon NPs.

NOTE: See above note.

Alstrom's Warbler

Seicercus soror

Two birds seen well in Kaeng Krachan NP.

NOTE: See Above note:

Chestnut-crowned Warbler

Seicercus castaniceps

One seen on Doi Inthanon.

Oriental Reed Warbler

Heard in Khao Yai NP.

Acrocephalus orientalis

One seen in an open grassy area in Khao Yai NP.

Thick-billed Warbler (H)

Acrocephalus aedon

Grassbirds & Allies Megaluridae

Russet Bush Warbler (H)

Bradypterus mandelli

Heard in the distance on Doi Inthanon.

NOTE: Three species now accepted: Russet, Dalat and Taiwan Bush Warblers.

Lanceolated Warbler (H)

Locustella lanceolata

This ultra-secretive species was heard extremely close-by near our Kaeng Krachan accommodation.

Cisticolas & Allies Cisticolidae

Zitting Cisticola

Cisticola juncidis

Six birds seen around a wetland near Khao Yai NP.

Golden (Bright)-headed Cisticola

Cisticola exilis

A singleton showed very well in Khao Yai NP.

Hill Prinia

Prinia atrogularis

Heard and seen briefly in Doi Inthanon NP.

NOTE: Two species now accepted: Black-throated Prinia and Hill Prinia.

Grey-breasted Prinia

Prinia hodgsonii

Small numbers seen around Kaeng Krachan, Doi Lor and near Doi Inthanon.

Yellow-bellied Prinia

Prinia flaviventris

One vocal bird showed very well at Ban Bang Ta Boon.

Plain Prinia

Prinia inornata

Seen in open scrubby habitat in the lowlands.

Common Tailorbird

Orthotomus sutorius

Several birds were seen in scrub in Kaeng Krachan and Khao Yai NPs.

Dark-necked Tailorbird

Orthotomus atrogularis

Seen commonly and very well in Kaeng Krachan and Khao Yai NPs.

Babblers, Parrotbills & Allies Timaliidae

Rusty-cheeked Scimitar Babbler

Pomatorhinus erythrogenys

One seen well but briefly in Doi Inthanon NP.

White-browed Scimitar Babbler

Pomatorhinus schisticeps

One vocal individual showed briefly in Kaeng Krachan NP.

Rufous-fronted Babbler

Stachyridopsis rufifrons

A pair showed briefly with another better sighting later on in the understory in Kaeng Krachan NP.

Golden Babbler

Stachyris chrysaea

Brief views of one in Kaeng Krachan NP.

Pin Striped Tit-Babbler

Macronous gularis

Commonly heard and seen at most forests.

NOTE: Recently split into two species: Bold-striped and Pin-striped Tit-Babblers.

Chestnut-capped Babbler (H)

Timalia pileata

Heard in the distance on our last morning near Doi Inthanon.

Fulvettas, Ground Babblers Pellorneidae

Rufous-winged Fulvetta

Alcippe castaneceps

Fantastic views at close range in Doi Inthanon NP.

NOTE: Recently split into two species: Rufous-winged and Black-crowned Fulvettas.

Brown-cheeked Fulvetta

Alcippe poioicephala

We found around 20 in Kaeng Krachan NP.

Yunnan Fulvetta Alcippe morrisonia

Large numbers seen on Doi Inthanon.

NOTE: The Grey-cheeked Fulvetta complex has recently been split into many different species, Yunnan Fulvetta being one of those splits.

Limestone Wren-Babbler

Napothera crispifrons

We had excellent views of two on the limestone cliffs at a Wat near Bangkok. **Eye-browed Wren-Babbler**Napothera epilepidota

We had good looks at a pair in Doi Inthanon NP.

Collared Babbler Gampsorhynchus torquatus

A furtive family group was seen briefly in hill forest at Kaeng Krachan NP.

NOTE: Two species now accepted: White-hooded Babbler and Collared Babbler.

Abbott's Babbler Malacocincla abbotti

We enjoyed great views of one in Khao Yai NP.

Puff-throated BabblerPellorneum ruficeps

Excellent views were had of a pair in Kaeng Krachan NP.

Laughingthrushes Leiothrichidae

White-crested Laughingthrush

Garrulax leucolophus

Eight of these handsome birds showed extremely well in Khao Yai NP.

White-necked Laughingthrush Garrulax strepitans

Two of these extremely retiring laughingthrushes were heard and then seen briefly in Doi Inthanon NP.

Greater Necklaced Laughingthrush (H) Garrulax pectoralis

Heard twice in Kaeng Krachan NP.

Black-throated Laughingthrush (H) Garrulax chinensis

This species melodic and beautiful song was heard at close range in Khao Yai NP but wouldn't show.

Silver-eared Laughingthrush Garrulax erythrocephalus

We had superb views of several birds at the summit of Doi Inthanon NP.

NOTE: The Chestnut-crowned Laughingthrush complex has recently been split into multiple species with Silver-eared

Laughingthrush being one of those splits.

Blue-winged Minla (Siva)

Minla cyanouroptera

Ten seen at Doi Inthanon.

Bar-throated (Chestnut-tailed) Minla *Minla strigula*

Great looks at around 30 birds around the summit of Doi Inthanon NP. **Spectacled Barwing**Actinodura ramsayi

We had excellent views of a group on Doi Inthanon.

Rufous-backed Sibia (H)Heterophasia annectens

Unfortunately only heard in a flock on Doi Inthanon.

Dark-backed Sibia Heterophasia melanoleuca

Commonly seen in Doi Inthanon NP.

Sylviid Babblers, Parrotbills, Myzornis Sylviidae

Grey-headed Parrotbill

Paradoxornis gularis

We were thrilled to find a flock of eight birds in Doi Inthanon NP.

White-eyes Zosteropidae

Chestnut-flanked White-eye

Zosterops erythropleurus

Large numbers seen throughout the tour.

Oriental White-eve

Zosterops palpebrosus

The most widespread of the white-eyes. We had good views at Khai Yai and Doi Inthanon NPs.

Fairy-bluebirds *Irenidae*

Asian Fairy-bluebird

Irena puella

Three of these gorgeous birds were seen in Kaeng Krachan NP with further sightings in Khao Yai NP.

Nuthatches Sittidae

Chestnut-vented Nuthatch

Sitta nagaensis

Four seen on Doi Inthanon.

Velvet-fronted Nuthatch

Sitta frontalis

Two separate sightings were had on Doi Inthanon.

Treecreepers *Certhidae*

Hume's (Brown-throated) Treecreeper

Certhia discolor

Excellent, close looks at a single bird on Doi Inthanon.

NOTE: Brown-throated Treecreeper was recently split into two species: Sikkim and Hume's Treecreepers.

Starlings Sturnidae

Common Hill Myna

Gracula religiosa

Recorded at Kaeng Krachan and Khao Yai NPs.

NOTE: Four species now accepted: Common, Southern, Nias and Enggano Hill Mynas. **Great (White-vented) Myna**

Acridotheres javanicus

Commonly seen throughout the lowlands and in open habitats.

Common Myna Commonly seen throughout the trip.

Black-collared Starling

Sturnus nigricollis

Acridotheres tristis

This handsome species was seen on our final morning near Doi Inthanon NP.

Pied Myna (Asian Pied Starling)

Sturnus contra

Small numbers seen in open areas on three dates.

White-shouldered Starling

Sturnia sinensis

Excellent views were had of this rather localised and scarce species in the Pak Thale area.

Chestnut-tailed Starling

Sturnia malabarica

Good views of six near Khao Yai NP.

Thrushes & Allies Turdidae

Evebrowed Thrush

Turdus obscurus

One male showed well in Doi Inthanon NP.

Green Cochoa (H)

Cochoa viridis

We heard this species calling in Doi Inthanon NP but despite our best efforts were unable to locate it.

Chats & Old World Flycatchers Sylviidae

Oriental Magpie-Robin

Copsychus saularis

A common species, seen on most days of the trip.

White-rumped Shama

Copsychus malabaricus

A few of these songsters were seen in Kaeng Krachan and Khao Yai NPs.

NOTE: Split into two species: White-rumped and White-crowned Shamas.

Dark-sided (Siberian) Flycatcher

Muscicapa sibirica

Two seen in Kaeng Krachan NP.

Asian Brown Flycatcher

Muscicapa dauurica

A few were seen in Kaeng Krachan and Khao Yai NPs.

NOTE: Two species now regarded: Asian Brown and Brown-streaked Flycatchers with several more splits probably to come.

White-gorgeted Flycatcher

Ficedula monileger

Good views (at least for this species) were had of two birds in Doi Inthanon NP.

Hainan Blue Flycatcher

Cyornis hainanus

A total of five males seen during the trip with especially good views in Khao Yai NP.

Pale Blue-Flycatcher

Cyornis unicolor

A female was seen briefly on Doi Inthanon.

Hill Blue Flycatcher

Cyornis banyumas

Three birds showed well in Kaeng Krachan NP.

Tickell's Blue Flycatcher

Cyornis tickelliae

A singing male showed briefly at Huai Hong Krai.

Blue-throated Blue Flycatcher (H)

Cyornis rubculoides

Heard at lower elevation in Doi Inthanon NP.

NOTE: Recently split into two species: Blue-throated and Chinese Blue Flycatchers.

Niltava grandis

Large Niltava Brief views of a pair in Doi Inthanon NP.

Small Niltava (H)

Niltava macgrigoria

Heard in Doi Inthanon NP.

Verditer Flycatcher

Eumyias thalassinus

Commonly seen at all forests.

Lesser Shortwing (H) Heard on Doi Inthanon. Brachypteryx leucophrys

White-browed Shortwing

Brachypteryx montana

We had excellent views of a singleton at Mr Daeng's, Doi Inthanon. A very shy species!

Siberian Blue Robin

Luscinia cyane

A female showed very well at Mr Daeng's, Doi Inthanon.

White-bellied Redstart (H)

Hodgsonius phaenicuroides

Heard once on Doi Inthanon.

Siberian Rubythroat (H)

Luscinia calliope

Heard near our hotel in the Kaeng Krachan area and in Khao Yai NP.

One showed well but briefly in Doi Inthanon NP.

Enicurus immaculatus

Slaty-backed Forktail A singleton popped up in Doi Inthanon NP.

White-crowned Forktail

Black-backed Forktail

Enicurus schistaceus

Enicurus leschenaulti

Brief views were had of one at the summit of Doi Inthanon.

NOTE: Now regarded as two species: White-crowned and Bornean Forktails.

Blue Whistling-Thrush

Myophonus caeruleus

Our first sighting was in Khao Yai NP with further sightings at Doi Inthanon NP. We recorded both the

resident, yellow-billed race and the migrant race with the all black bill.

Slaty-backed Flycatcher

Ficedula hodgsonii

A single male showed in Doi Inthanon NP.

Taiga (Red-throated) Flycatcher Ficedula albicilla

Commonly seen throughout.

NOTE: Two species now exist: Red-breasted and Taiga (Red-throated) Flycatchers.

Little Pied Flycatcher Ficedula westermanni

Males and females were seen on a few occasions in Doi Inthanon NP. **Slaty-blue Flycatcher**Excellent views of a female and brief views of males on Doi Inthanon.

Plumbeous Water Redstart

Phoenicurus fulginosus

Superb views of a pair in Doi Inthanon NP.

White-capped Redstart Chaimarrornis leucocephalus

This spectacular bird was seen very well at Doi Inthanon NP.

Blue Rock Thrush

Monticola solitarius

A female was seen in Khao Yai NP with a further two seen in Doi Inthanon NP.

Chestnut-bellied Rock Thrush *Monticola rufiventris*

A female was seen well in Doi Inthanon.

Siberian Stonechat Saxicola maurus

Several seen at a wetland near Khao Yai NP.

NOTE: Common Stonechat now regarded as 7 species, Siberian Stonechat being one of seven species.

Pied Bush Chat Saxicola caprata

A pair showed well at Doi Lor rice fields.

Grey Bush Chat Saxicola ferreus

Small numbers were seen at Doi Inthanon.

Leafbirds Chloropseidae

Greater Green Leafbird Chloropsis sonnerati

Four birds showed well in Kaeng Krachan NP.

Blue-winged Leafbird Chloropsis cochinchinensis

Seen on five dates in small numbers.

NOTE: Three species are now known: Blue-winged, Jerdon's and Bornean Leafbirds respectively.

Golden-fronted Leafbird Chloropsis aurifrons

Two birds were seen at Huai Hong Krai.

Orange-bellied Leafbird Chloropsis hardwickii

Pairs and singletons showed well in Doi Inthanon NP.

Flowerpeckers Dicaeidae

Yellow-vented Flowerpecker Dicaeum chrysorrheum

We had good views of several birds in Kaseng Krachan NP with another sighting in Khao Yai NP.

Yellow-bellied Flowerpecker Dicaeum melanoxanthum

Brief views of a female on Doi Inthanon.

Plain Flowerpecker Dicaeum minullum

Four birds showed very well in Kaeng Krachan NP.

Fire-breasted Flowerpecker Dicaeum ignipectus

Small numbers seen in Khao Yai and Doi Inthanon NPs.

Scarlet-backed Flowerpecker

Dicaeum cruentatum

Small numbers were seen in Kaeng Krachan NP and en route to Doi Inthanon.

Sunbirds & Spiderhunters Nectariniidae

Ruby-cheeked Sunbird

Chalcoparia singalensis

We saw several of these smart birds at Kaeng Krachan and Khao Yai.

Brown-throated Sunbird

Anthreptes malacensis

A pair showed well in a flowering tree at a coffee break en route to Doi Inthanon.

NOTE: Recently split into two species: Brown-throated and Grey-throated Sunbirds. **Purple Sunbird**Cinnyris asiaticus

Two males showed well in dry woodland near Doi Inthanon.

Olive-backed Sunbird

Cinnyris jugularis

Commonly seen at Kaeng Krachan and Khao Yai NPs.

Mrs Gould's Sunbird

Aethopyga gouldiae

This stunner showed well in Doi Inthanon NP.

Green-tailed Sunbird

Aethopyga nipalensis

A male was finally found near the summit of Doi Inthanon NP.

Black-throated Sunbird

Aethopyga saturata

First recorded in the higher areas in Kaeng Krachan NP and later seen fairly commonly in Doi Inthanon NP.

(Eastern) Crimson Sunbird

Aethopyga siparaja

This stunning species was seen very well in Kaeng Krachan and Khao Yai NPs.

NOTE: Sometimes Split into two species: Eastern Crimson Sunbird and Vigor's Sunbird.

Little Spiderhunter

Arachnothera longirostra

A single bird was seen in Khao Yai NP.

Yellow-eared Spiderhunter

Arachnothera chrysogenys

A surprise find of a single bird in Kaeng Krachan NP.

Streaked Spiderhunter

Arachnothera magna

Two seen in Kaeng Krachan NP with another sighting on Doi Inthanon.

Old World Sparrows Passeridae

House Sparrow

Passer domesticus

Seen in the Bangkok area.

Plain-backed Sparrow

Passer flaveolus

Excellent views of small numbers at a wetland near Khao Yai NP.

Eurasian Tree Sparrow

Passer montanus

This species was recorded in small numbers at virtually all towns throughout the trip.

Waxbills, Munias & Allies Estrildidae

Scaly-breasted Munia (Nutmeg Mannikin)

Lonchura punctulata

Small numbers were seen at many sites, on four dates, especially in lowland areas.

Wagtails & Pipits Motacillidae

Eastern Yellow Wagtail

Motacilla tschutschensis

Three seen at a wetland near Khao Yai NP.

NOTE: Now regarded as two species: Western and Eastern Yellow Wagtails. Many unique subspecies exist within both complexes that may very well be split further in future. The race of Eastern Yellow Wagtail that we saw was tschutschensis.

Grey Wagtail Motacilla cinerea

Recorded at the higher elevations of Khao Yai and Doi Inthanon.

White Wagtail Motacilla alba

Singletons were seen on four dates.

Richard's Pipit Anthus richardi

One was seen at a wetland near Khao Yai.

NOTE: Has been split into many different species for many years now.

Paddyfield Pipit Anthus rufulus

Small numbers were seen at various grassy areas.

Olive-backed Pipit Anthus hodgsoni

First seen at Kaeng Krachan and then again on Doi Inthanon.

ANNOTATED LIST OF MAMMALS RECORDED: (16 species recorded

(14 seen and 2 heard only))

Old World Monkeys Cercopithecidae

Crab-eating (Long-tailed) Macaque

Macaca fascicularis

A few of these monkeys were seen near Petchaburi.

Southern Pig-tailed Macaque

Macaca nemestrina

Up to 20 were seen daily in Khao Yai NP.

Dusky Leaf-monkey Trachypithecus obscurus

A common species with up to 12 seen daily in Kaeng Krachan NP.

Gibbons Hylobatidae

Lar (White-handed) Gibbon (H)

Hylobates lar

Unfortunately only heard in the distance in Kaeng Krachan.

Pileated Gibbon (H)

Hyloba

Only heard in Khao Yai NP.

Hylobates pileatus

Squirrels Sciuridae

Grey-bellied Squirrel

Callosciurus caniceps

Small numbers were seen at Kaeng Krachan and Khao Yai NPs.

Finlayson's (Variable) Squirrel

Callosciurus finlaysonii

We enjoyed good views of several in Kaeng Krachan and Khao Yai NP.

Pallas's (Red-bellied Mountain) Squirrel

Callosciurus erythraeus

We had good sightings at Doi Inthanon.

Black Giant Squirrel

Ratufa bicolor

Singletons seen in Khao Yai and Doi Inthanon NPs.

Himalayan Striped Squirrel

Tamiops mcclellandii

Small numbers were seen in Kaeng Krachan, Khao Yai and Doi Inthanon NPs.

Deer Cervidae

Southern Red Muntjac

Muntiacus muntjak

Two were seen well in Khao Yai NP.

Sambar Deer

Cervus unicolor

Fairly common at Khao Yai NP where the animals are confiding.

Porcupines *Hystricidae*

Malayan Porcupine

Hystrix brachyura

Two were seen crossing the road one evening in Khao Yai NP.

Flying Fox Pteropodidae

Lyle's Flying Fox

Pteropus lylei

Eight of these large mammals were seen in the Laem Pak Bia area.

Treeshrews Tupaiidae

Northern Treeshrew

Tupaia belageri

One sighting at Mr Daeng's, Doi Inthanon.

Martens, Weasels & Allies Mustelidae

Yellow-throated Marten

Martes flavigula

Fabulous views were enjoyed of three of these beautiful mammals in gorgeous late afternoon light at the top of Kaeng Krachan.

REPTILES

Water Monitor

Varanus salvator

We had good views of several at Leam Pak Bia, Kaeng Krachan and Khao Yai.

Burmese Python

Python bivittatus

This huge snake was seen crossing the road on the drive out of Kaeng Krachan NP.

Tokay Gecko

Gekko gecko

Heard and seen a few times in the Kaeng Krachan area.

Snake sp.

A small, unidentified snake was seen in Khao Yai NP.

Turtle sp.

A few of these in the river at the restaurant and information centre area in Khao Yai NP.
