This tour just gets better and better. This year the 7 participants, Rob and Baldomero enjoyed a bird filled trip that found 723 species of birds. We had particular success with some tricky groups, finding 12 Rails and Crakes (all but 1 being seen!), 11 Antpittas (8 seen), 90 Tanagers and allies, 71 Hummingbirds, 95 Flycatchers. We also found many of the iconic endemic species of Northern Peru, such as White-winged Guan, Peruvian Plantcutter, Marañón Crescentchest, Marvellous Spatuletail, Pale-billed Antpitta, Long-whiskered Owlet, Royal Sunangel, Koepcke’s Hermit, Ash-throated
Antwren, Koepcke’s Scrub Echidna, Yellow-faced Parrotlet, Grey-bellied Comet and 3 species of Inca Finch. We also found more widely distributed, but always special, species like Andean Condor, King Vulture, Agami Heron and Long-tailed Potoo on what was a very successful tour.

Top 10 Birds

1. Marañón Crescentchest  
2. Spotted Rail  
3. Stygian Owl  
4. Ash-throated Antwren  
5. Stripe-headed Antpitta  
6. Ochre-fronted Antpitta  
7. Grey-bellied Comet  
8. Long-tailed Potoo  
9. Jelski’s Chat-Tyrant  
10. = Chestnut-backed Thornbird, Yellow-breasted Brush Finch

You know it has been a good tour when neither Marvellous Spatuletail nor Long-whiskered Owlet make the top 10 of birds seen!

Day 1: 4 September: Pacific coast and Chaparri

Upon meeting, we headed straight towards the coast and birded the fields near Monsefue, quickly finding Coastal Miner. Our main quarry proved trickier and we had to scan a lot of fields before eventually finding a distant flock of Tawny-throated Dotterel; we walked closer, getting nice looks at a flock of 24 of the near-endemic pallidus subspecies of this cracking shorebird. The Santa Rosa beach area was very productive with lots of seabird activity offshore, we saw large numbers of Peruvian Booby, Peruvian Pelican, Guanay Cormorant and Inca Tern, with a good supporting cast that included Grey Gull, South American Tern and Blue-footed Booby. Turning to the dunes, we soon found a very cooperative male Least Seedsnipe. A surprise here was a very obliging Short-eared Owl. The drainage channel held Many-colored Rush Tyrant and Wren-like Rushbird but the strong wind made viewing difficult; we were eventually rewarded with great looks at the former but had to settle with ‘dash past’ and ‘sing looks’ at the latter. Just outside Santa Rosa, we found 21 Peruvian Thick-knees at their day roost amongst the garbage. The small pools near San José gave us a good variety of Nearctic waders plus Andean Lapwing, Puna Ibis, Cinnamon Teal and White-cheeked Pintail. We headed inland towards Chaparri EcoLodge, pausing en route to see Savannah Hawk, Pearl Kite, Northern Crested Caracara and a colony of Chestnut-collared Swallows.

We arrived for lunch and saw a pair of Superciliated Wrens, Amazilia Hummingbird, Grey-and-white Tyrannulet, Pale-legged (Pacific) Hornero and a White-winged Guan as we ate. An afternoon walk soon yielded

Blue-footed Booby by Dusan Brinhuizen
the delightful Tumbes Tyrant, Scarlet-backed Woodpecker, White-edged Oriole, Baird’s Flycatcher, amongst others. We also saw several Sechua Fox, 15 Collared Peccary, including 4 very young “piglets” and the endemic Guayaquil Squirrel. An after dinner walk produced reasonable looks at 3 West Peruvian Screech Owls (the pacificus subspecies).

Day 2: 5 September: Chaparri
We started the day with coffee and hummingbirds, seeing Purple-collared Woodstar, Amazilia Hummingbird and Tumbes Hummingbird coming to bathe in the stream by the dining room. After breakfast, we walked down the entrance road, picking up Collared Warbling Finch, Cinereous Finch, Necklaced Spinetail, Harris’s Hawk and several flocks of the declining and range restricted Sulphur-throated Finch and the littorale subspecies of Cinereous Conebill.

In the afternoon, we headed down to Tinajones reservoir; getting good looks at a Rufous Flycatcher and a great comparison of a female Peruvian Sheartail and Short-tailed Woodstar sitting next to each other. At the reservoir, we found a good variety of waterbirds, including Great Grebe. At dusk, we headed to Cerro Racarumi in the hope of finding an Anthony’s (Scrub) Nightjar. Unfortunately, a very strong wind picked up and we only heard one distantly.

Day 3: 6 September: Casupe and Chaparri
We began with an early drive up to Casupe. On the way out of Chaparri reserve, we found a Band-winged Nightjar of the decussatus subspecies - now often considered a separate species Tschudi’s Nightjar (though there is still a debate about which English name to use for this taxon) which is endemic to the coastal deserts of Peru. We enjoyed great looks at a male on the ground and in flight. Climbing up to Casupe, we stopped and heard 3 White-winged Guans. Arriving at the breakfast site, we soon saw Yellow-tailed Oriole, Three-banded Warbler, Grey-and-gold Warbler, Long-billed Starthroat, Tumbes Pewee (previously considered the punensis subspecies of Tropical Pewee) Plumeous-backed Thrush, Ecuadorian Piculet and the porcullae subspecies of Grey-chinned Hermit, which is often and deservedly considered a separate species - Porculla Hermit. After breakfast, we added Ecuadorian Trogon (a recent split from Black-tailed Trogon) and Grey-breasted Flycatcher. We then headed up towards the pass; the road was being worked on so we walked back down, picking up Black-cowled Saltator, Hepatic Tanager, Rusty Flowerpiercer, Hooded Siskin, Speckle-breasted Wren, Tumbesian Tyrannulet and Pacific Elaenia. A cloudless sky meant it got
very hot early and activity died off fast. Below the village we added Sooty-crowned Flycatcher and headed back to Chaparri for lunch, picking up an immature Variable Hawk on the way.

In the heat of the afternoon, a brief raptor watch by Jan and Rob produced 2 Black-chested Eagles, 1 adult king Vulture and an immature Harris’s Hawk. In the afternoon we further explored the Chaparri trails.

Day 4: 7 September: Tinajones to Pomac, Tucume and Salas
Leaving Chaparri, we headed to Tinajones reservoir and after some effort, we obtained great looks at a Spotted Rail; having broken the curse, we lucked into another as we walked back to the van and heard a third.

We drove on to Bosque de Pomac and quickly found a male Peruvian Plantcutter that showed well for all. We then spent some time exploring the Huca Las Ventanas pyramid of the Sican culture. The view from the top across the dry forest to the other pyramid was particularly impressive. We drove on to another site within the reserve where we quickly had good views of at least 2 Tumbes Swallows. We headed to lunch near Tucume and then visited the new museum and archaeological site.

A brief stop at La Viña reservoir found it completely dry. We arrived at the hotel and some dusk birding produced a fly-over Lesser Nighthawk and a flyby Anthony’s (Scrub) Nightjar; despite our best efforts, we could elicit no calls or repeat appearances.

Day 5: 8 September: Abra Porculla and Jaen Area
An early start saw us above the village of Limon de Porculla for dawn. We enjoyed a field breakfast with stunning views and then caught up with our target birds, including Line-cheeked Spinetail, Bay-crowned Brush Finch, Piura Chat-Tyrant, Henna-hooded Foliage-gleaner, Rufous-necked Foliage-gleaner and Black-capped Sparrow. Shortly after crossing the pass we found an adult male Andean Condor and Bare-faced Ground Doves.

At Chamaya, we birded the thorn scrub and eventually obtained good looks at Little Inca Finch. Here we also saw our first Spot-throated Hummingbird, flushed a number of Lesser Nighthawks, and had brief looks at the *shumbae* subspecies of Collared Antshrike.

After lunch, we took a side road above Jaen; we started in the shaded part of the hill as it was very hot, finding Purple-throated Euphonia and Great Antshrike. As the sun went down, we moved up the slope and picked up “Marañón” Northern
Slaty Antshrike, Dull-colored Grassquit, Marañón Crescentchest, Marañón (Peruvian) Pigeon and Speckled Chachalaca.

Day 6: 9 September: Tamborapa road, Jaen area and Pomacochas
Dawn found us in the field near Tamborapa. Our main target bird here was Marañón Spinetail and we very quickly found one sitting in the road having apparently been stunned by a car collision. Fortunately, it quickly recovered and flew away; apparently none the worse for its experience. We added the chinchipensis form of Necklaced Spinetail (formerly and still sometimes considered a separate species: Chinchipe Spinetail). Red Pileated Finch (now called Red-crested Finch by Clements), Brown-crested Flycatcher, 2 Marañón Crested Flycatcher, and White-bellied Woodstar, Bronzy Inca, Lesser (Green) Violetear, Violet-fronted Brilliant, Chestnut-breasted Coronet, Andean Emerald and White-bellied Hummingbird. Silvery (Silver-backed) Tanager, Chestnut-capped Brush Finch and Speckle-chested Piculet were in the grounds and Mitred Parakeets flew over. Rainclouds loomed and activity was low so we headed up to Pomacochas Lake where we had great looks at Plumbeous Rail and Puna Snipe.

Day 7: 10 September: San Lorenzo Trail and Pomacochas area
We awoke to an earthquake that measured 6.1 on the Richter scale - with the epicentre only some 70km away – fortunately, there was no damage and the greatest inconvenience

Crescentchests and Rufous-fronted Thornbird were also found here. Tataupa Tinamous called and flocks of Scarlet-fronted Parakeet flew past.

On the way back to Jaen, we stopped at some rice fields near Huabal and had jigsaw views of Paint-billed Crakes, but with persistence, all managed to see this elusive bird. We also had good looks at Drab Seedeater and some flyby Ecuadorian Ground Doves. Having cleaned up the required Marañón specialities near Jaen, we gathered our bags plus Jan and Kirby, who had taken a morning off, and headed across the Marañón River to Pedro Ruiz and the Cordillera del Colán. En route we drove up the impressive valley of the Utcubamba valley, finding an obliging adult Fasciated Tiger Heron.

After lunch in Pedro Ruiz on the bank of the Utcubamba valley, we climbed towards Pomacochas, stopping at the Marvellous Spatuletail Visitor Centre at Huembo. Here we watched the hummingbird feeder for a while, seeing at least 5 male and 2 female Marvellous Spatuletails. We also saw White-bellied Woodstar, Bronzy Inca, Lesser (Green) Violetear, Violet-fronted Brilliant, Chestnut-breasted Coronet, Andean Emerald and White-bellied Hummingbird. Silvery (Silver-backed) Tanager, Chestnut-capped Brush Finch and Speckle-chested Piculet were in the grounds and Mitred Parakeets flew over. Rainclouds loomed and activity was low so we headed up to Pomacochas Lake where we had great looks at Plumbeous Rail and Puna Snipe.

Ochre-fronted Antpitta by David Shackelford
was no electricity for a few minutes. After a candlelit breakfast, we left to walk up the San Lorenzo trail.

We made good progress and soon reached the area for our target species, the fabulous Pale-billed Antpitta. We had nice looks at an adult and a juvenile. We took advantage of the altitude we had gained and carried on birding the ridgeline, picking up Violet-throated Starfrontlet of the *dichrous* subspecies, Amethyst-throated Sunangel, Rufous Spinetail, Plain-tailed Wren, Peruvian Wren, Green-and-black Fruiteater, Drab Hemispingus, amongst others, and hearing Russet-mantled Softail and Powerful Woodpecker.

After lunch, we headed back to Huembo Marvellous Spatuletail Visitor Centre. Between rain showers, we had great looks at a female Little Woodstar, Green-tailed and Black-tailed Trainbearers, Black-and-white Becard and Andean Guan. On the way back to the hotel near the Rio Chido Bridge, we found Sickle-winged Guan, Torrent Duck and White-capped Dipper.

**Day 8: 11 September: Abra Patricia area**

After an early breakfast, we drove east to the wonderful Abra Patricia area. The humid forests, clinging to the northern extreme of the eastern cordillera of the Andes in Peru, are home to some of the richest avifauna in the world. We started birding along the road and soon heard, and Stuart glimpsed, an Ochre-fronted Antpitta. The nutrient-poor ridges of the Garcia area soon produced Rufous-tailed Tyrant and with time we had great looks at a male of the rare and very localised Royal Sunangel. We started seeing some flocks and picked up a variety of tanagers, including Rufous-crested, Flame-faced, Saffron-crowned, Beryl Spangled and Metallic Green. Near Alto Nieva, we walked a trail finding Mottle-cheeked Tyrannulet, Cinnamon-breasted Tody-Tyrant and Pale-edged Flycatcher.

Despite the threatening storm clouds and a mid-afternoon shower, we headed down the owlet trail for our first attempt for the Long-whiskered Owlet - full of optimism. En route we found a pair of Olive Flycatchers and a few mixed flocks. In the valley bottom, we heard several good birds, including White-faced Nunbird, Slaty-backed Nightingale-thrush and another Ochre-fronted Antpitta. On the trail, we saw a Chestnut-capped Brush Finch and glimpsed an Olive Finch. As dusk came, we heard a Rufous-bellied Nighthawk and a distant Rufous-banded Owl before the heavens opened. We waited around an hour but the weather was getting worse and there was no sign of the owlet so we reluctantly headed back to the lodge for dinner.

**Day 9: 12 September: Abra Patricia area**

We started the day with great views of a pair of Ochre-fronted Antpittas; the male especially performed fantastically. We continued down to the area near the Llanteria where visited the
hummingbird feeders, catching up with Peruvian Piedtail and Reddish Hermit. Some great canopy flocks passed by, holding a good variety of Tanagers.

Several Andean Cock-of-the-Rocks fed in fruiting palms. We had eye-level looks at Ecuadorian Tyrannulet. On the forest trail, we heard an Ash-throated Antwren and a Sharpbill and saw Ornate Flycatcher, Crimson-crested Woodpecker and Ruddy Pigeon. It was very sunny and activity ceased towards midday so we headed higher and made a brief stop at Alto Nieva where we found a Bar-winged Wood Wren and Speckle-chested Piculet.

In the afternoon, we headed back down the trail to look for the owlet. Before dark, we found Streak-headed Antbird. The Long-whiskered Owlet played very hard to see but, with persistence, all had at least some views of this tiny, secretive owl and we heard at least 2 calling. We also heard Rufous-banded Owl and Andean Pygmy Owl.

**Day 10: 13 September: Abra Patricia Lodge and area**

Before dawn, we looked for and heard White-throated Screech Owl – Rob managing to get flight views. We spent the morning birding the trails at Owlet lodge. Bright sunlight made it hard work as there was little activity but we gradually teased out a selection of good birds, including Peruvian Wren, Golden-headed Quetzal and Chestnut-breasted Chlorophonia.

After lunch, we headed down to the Alto Nieva area. Time was spent looking for raptors, which gave us a Short-tailed Hawk. Working a side trail gave us Speckle-breasted Piculet and Bar-winged Woodwren in quick succession. We saw a couple of small flocks on the way back to the lodge but found no new birds. We spent the late afternoon on the trails again, finally managing to see Rusty-tinged Antpitta. A mixed flock entertained us and we added Tyrannine Woodcreeper to our lists. At dusk, we tried for Cinnamon Screech Owl and had a couple calling very close, unfortunately, we could not get views in the dense bamboo.

**Day 11: 14 September: Abra Patricia to Tarapoto**

We made an early start towards the lowlands. A stop just before dawn gave us great looks at a male Lyre-tailed Nightjar perched on a branch and then flying overhead, silhouetted against the lightening sky.

We then visited the Arena Blanca reserve, seeing a Red-ruffed Fruitcrow on arrival. Little Tinamou and Orange-billed Sparrow were seen well at the maize feeding station. The hummingbird feeders held a good variety of species, including the rare and local Black-throated Brilliant, Blue-fronted and Green-fronted Lancebills, Many-spotted
Hummingbird, the fantastic Wire-crested Thorntail and Rufous-crested Coquette. We then headed on to a restaurant and some forest near Rioja where we had great looks at Rufous-sided Crake and found a variety of common lowland Amazonian species.

After lunch, we drove on to drop Kirby off at Moyobamba, before heading to Tarapoto. We visited the lake near town and found 163 Black-bellied Whistling Ducks (a Peru tick for Rob!), 30+ Comb Ducks and a good variety of other waterbirds. The second Rufous-sided Crake of the day was seen and a pair of duetting Grey-breasted Crakes could not be lured into view. A Planalto Hermit was seen briefly, a Grey-cowled Woodrail crossed the road in front of us and we saw our first Ferruginous Pygmy Owl of the trip.

Day 12: 15 September: Cordillera Escalera and Shapaja road
After an early breakfast, we drove up the Cordillera Escalera. Our first stop found some fruiting trees that yielded Euphoria Euphoria with 7 species feeding in them: Orange-bellied, Bronze-green, White-vented, Thick-billed, Purple-throated, Plumbeous and Blue-naped Chlorophonia. A male Dotted Tanager joined them - the first of several we would see during the day. Further up the road, we enjoyed some flocks of Tanagers, picking up Olive (Carmiol’s) Tanager and a female Black-and-white Tanager. Other notable birds included Rufous-tailed Antwren and a fly-past White-tipped Sicklebill. At Konabikh reserve we enjoyed the hummingbird feeders, getting great looks at several Koepeke’s Hermits and Gould’s Jewelfronts, amongst others. The trails here gave us fantastic views of a roosting Long-tailed Potoo and a Golden-headed Manakin lek. In the afternoon, we headed to the Shapaja road, picking up Pearly-vented Tody-Tyrant, Sulphur-bellied Tyrant-Manakin. We stopped for a sundowner drink at a local hotel and waited for dusk to do some owling. We were rewarded with a fly-over Vampyrus spectrum - South America’s largest bat. We heard both Spectacled and Crested Owls but could not lure them close enough to see - the full moon and clear skies not helping our quest.

Day 13: 16 September: Quebrada Upaquihua and to Moyobamba
We started the day with a Tropical Screech Owl in the hotel grounds before heading south-east, up the Huallaga valley to the semi-deciduous forests of Quebrada Upaquihua. A Tataupa Tinamou crossed the road ahead of us as we drove in. It was a relatively cool morning which was a relief as it can get hot very quickly here. We bired the trails here, picking up most of the specialties, including: Ashy-headed Greenlet, White-bellied Pygmy Tyrant, “Huallaga” Northern Slaty Antshrike, the striking keonigorum subspecies of White-browed Antbird where the white
forms a cap, and the fantastic looking *gustavi* subspecies of Cobalt-winged Parakeet, which is confined to the upper Huallaga valley. We also found widespread Amazonian species, including Bluish-fronted Jacamar, Rusty-capped Nunlet, Blue-winged Parrotlet, Barred Antshrike and Great Antshrike.

![Stygian Owl by Adam Riley](image)

We headed back to Tarapoto for a nice, typical lunch and then went on to Moyobamba. En route we stopped to look at Oilbirds in a ravine and found 41 on the ledges. A bonus here was a nice Boa Constrictor on a rock by the stream. A flock of 200+ White-collared Swifts wheeled overhead. Arriving at Moyobamba, we collected Kirby and went on to a wetland near the city where we found 4 Masked Ducks. The scrub nearby held Cinereous-breasted Spinetail and although our usual site for Russet-crowned Crake had been cleared for a new coffee plantation, we managed to find a few and most of the group got some looks at one. At the hotel, the keen owlers were rewarded with looks at 2 Band-bellied Owls.

**Day 14: 17 September: Tingana and Moyobamba area**
This morning we visited the flooded forests of Tingana, finding a good variety of Amazonian birds associated with such habitats, such as Agami Heron, Band-tailed Antbird, Silvered Antbird, Varzea Thrush and 5 species of Kingfisher.

In the afternoon, we explored the Moyobamba area taking in some of the specialities. We caught up with the Russet-crowned Crake for the people who had previously missed it. A small marsh area produced both Black-billed Seedfinch and Pale-eyed Blackbird. Another marsh in an area of rice fields held Blackish Rail and after some effort, we were rewarded with great views. We finished the day at Moro Calzada where we found 6 nightbirds in a short period of time with great looks at a perched Blackish Nightjar, nice flyby looks at Rufous Nightjar and the fabulous experience of a Stygian Owl flying over us, wing-clapping. After dinner, we headed uphill from the lodge and were rewarded with close views of a Napo (Vermiculated) Screech Owl.

**Day 15: 18 September: Quebrada Mishiquaquillo**
We made an early start for the high ridge above Quebrada Mishiquaquillo. The 600m climb was taxing but with such a gung-ho group we made it in good time and were rewarded with great looks at the endemic Ash-throated Antwren. A Buff-throated Tody-Flycatcher was a greatly appreciated bonus bird on the ridge. Other good species on the climb up and down were: Chestnut-throated Spinetail, Spot-winged Parrotlet, White-

![Agami Heron by Rich Lindie](image)
plumed and Hairy-crested Antbirds, Yellow-cheeked (Green-backed) Becard, Black-and-white Tody-Flycatcher, Blue-rumped Manakin (of the Milky-rumped leucopygia subspecies with a white crown and predominantly white rump), Yellow-crested Tanager, Golden-collared Toucanet and Fiery-throated Fruiteater, of which we found a nest.

After lunch, we sat out a heavy rainstorm before heading to the hummingbird feeders. We started looking for the rare and very shy Ocellated Crake, one flushed and was seen by Amy and Richard, and several others were heard but not seen. At Moro Calzada, we quickly found Wedge-tailed Grassfinch.

**Day 16: 19 September: To Gocta**  
Leaving Wakanqui, we found a Spot-tailed Nightjar. We started the serious birding just before Puente Aguas Verdes with a big flock of 3 Chaetura swift species. The main focus of the day was flocks and we soon hit the motherload, firstly with a tanager dominated flock that gave us several of the scarcer species, including Blue-browed, Golden-earred, Golden-naped and Orange-eared. We followed that up with another flock that was dominated by Flycatchers, getting: Marble-faced, Variegated and Spectacled Bristle Tyrants, Yellow-margined Flatbill, Peruvian and Sooty-capped Tyrannulets, Ornate Flycatcher and Slaty-capped Flycatcher. Other good birds accompanying the flocks were: Buff-browed Foliage-gleaner, the ochrogaster subspecies of Rufous-rumped Foliage-gleaner, Versicolored Barbet, Plain Antvireo, White-backed Fire-eye, Ash-browed Spinetail and Red-stained Woodpecker. The rain came in hard late-morning so we headed up over the pass and enjoyed lunch in a roadside restaurant before heading on towards the Utubamba valley.

At Gocta Lodge we enjoyed the views of the highest waterfall in Peru and some late-afternoon birding gave us Marañón Thrush. After dinner, the intrepid owlers were rewarded with great looks at the nominate form of Peruvian Screech Owl (surely a good split), also hearing a Buff-fronted Owl that could not be lured into view.

**Day 17: 20 September: Gocta, Kuelap and Leymebamba**  
Some pre-breakfast birding near the lodge produced Rufous-capped Antshrike and nice looks at some other familiar birds. We then drove up the spectacular Utubamba valley and up to the citadel of Kuelap. Here we enjoyed a few hours of exploring this fascinating archaeological site that is still shrouded in bromeliad clad trees and that has only been sparingly restored and conserved. As well as enjoying the site for its intrinsic beauty and history, we also enjoyed seeing Rainbow
Starfrontlet, Purple-throated Sunangel, Sword-billed Hummingbird, Black-throated Flowerpiercer and Tufted Tit-Tyrant. After lunch, we headed down to the Utubamba valley again and towards Leymebamba. En route we made some stops, picking up two roosting Koepecke’s Screech Owls, Black-necked Woodpecker, Plumbeous Rail and Baron’s Spinetail.

**Day 18: 21 September: Rio Atuen valley and Abra Barro Negro**

The Atuen river valley provided a challenging but rewarding morning’s birding. The weather started out as overcast before turning to rain and the birds seemed withdrawn and difficult to get to grip with. We persevered and found a series of flocks, getting good looks at some good birds like Russet-mantled Softtail, Aplomado Falcon, Grey-breasted Mountain Toucan, Northern Mountain Cacique and Tawny-rumped Tyrannulet. We then headed up towards Abra Barro Negro (Black Mud Pass) and enjoyed a picnic lunch whilst watching Moustached Flowerpiercer. Further up we found the endemic Coppery Metaltail. In the mid-afternoon, we visited the great museum at Laymebamba which focusses on the incredible archaeological finds at Laguna de los Condores.

**Day 19: 22 September: The mid-Marañón valley**

Today we crossed the deep canyon of the Marañón River which spans from the highlands of the eastern Andes to the western Andes. This journey entailed descending some 2000m in altitude to cross the river at the village of Balsas and took us from temperate forest and paramo to semi-deciduous forest and back to humid Andean scrub. On the way, we picked up a great series of birds, including the _leymembambae_ subspecies of Rusty-breasted Antpitta (surely a good species), Buff-bridled and Grey-winged Inca Finches, Yellow-faced Parrotlet, Chestnut-backed Thornbird, White-winged Black Tyrant and Jelski’s Chat-Tyrant. We arrived in Celendin for the night.

**Day 20: 23 September: Celendin to Cajamarca**

We enjoyed a field breakfast and then succeeded in finding the now very rare and local _cajamarcae_ subspecies of Rufous Antpitta (surely a good species since it is consequently one of the most threatened birds on earth - its tiny range and remaining habitat are highly fragmented and still being cleared). We moved on to higher ground, finding Peruvian Sierra Finch, Rufous-webbed Bush Tyrant, Andean Hillstar and Paramo Pipit. The Chonta river valley yielded a nice male Grey-bellied Comet, one of the most localised and rare hummingbirds in Peru. Here we also added Black Metaltail and Yellow-billed Tit-Tyrant. In the afternoon we headed to Abra El Galvan where we quickly saw another very range restricted species that persists in tiny fragments of habitat - the Unicolored Tapaculo.
Day 21: 24 September: San Marcos and Cajamarca area

We headed to the thorn scrub above San Marcos where we enjoyed wonderful looks at the Great Spinetail. Laguna San Nicolas gave us a selection of Andean waterbirds, including Andean Duck, Yellow-billed Teal, Yellow-billed Pintail, Andean Coot, Puna Ibis, Andean Gull and Wren-like Rushbird. A female Blue-winged Teal was an early migrant and a White-cheeked Pintail was unusual at this altitude.

We headed up to Cumbe Mayo, stopping en route for views of White-browed and Rufous-naped Ground Tyrants. We enjoyed a picnic lunch with Slender-billed Miner and White-tailed Rufous-naped Ground Tyrants. We enjoyed a walk through the impressive rock outcrops produced fantastic looks at Stripe-headed Antpitta, 3 species of Sierra Finch in one binocular view, Black Metaltail, White-winged and Cream-winged Cinclodes, Many-striped Canastero and Striated Earthcreeper. A fitting finale to a great tour.

We enjoyed a last dinner and list session back at the hotel.

Day 22: 25 September: Cajamarca and departure

After an early breakfast, it was time for our flights to Lima and onwards.

Bird List

Birds (723 in total)

Nomenclature and taxonomy follows Gill, F and D Donsker (Eds). 2015. IOC World Bird List (v 5.3).

Status codes: E = Endemic, NE = Near-endemic, I = Introduced

IUCN codes: CR = Critically endangered, EN = Endangered, VU = Vulnerable, EW = Extinct in the Wild, NT = Near Threatened, DD = Data Deficient

**DUCKS, GEESE, AND WATERFOWL - Anatidae**

**Torrent Duck** *Merganetta armata*
A male seen very well in the Rio Chido. A pair with two small chicks below Abra Patricia.

**Black-bellied Whistling-Duck** *Dendrocygna autumnalis*
163 seen well at Tarapoto.

**Comb Duck** *Sarkidiornis sylvicola*
40+ distantly at Tinajones reservoir, where exceptionally low water levels precluded access.
30+ seen well near Tarapoto.

**Blue-winged Teal** *Anas discors*
1 female at Laguna San Nicolas.

**Cinnamon Teal** *Anas cyanoptera*
Common on pools near San José and at Tinajones.

**White-cheeked Pintail** *Anas bahamensis*
About 50 near San José. Several at Tinajones and 1 at Laguna San Nicolas.

**Yellow-billed Teal** *Anas flavirostris*
Several near Leymebamba and at Laguna San Nicolas.

**Yellow-billed Pintail** *Anas georgica*
1 at Laguna San Nicolas.

**Masked Duck** *Nomonyx dominicus*
6 and 3 seen on two different lagoons near Moyobamba.

**Andean Duck** *Oxyura ferruginea*
1 near San José.

**GUANS, CHACHALACAS, AND CURASSOWS - Cracidae**

**Speckled Chachalaca** *Ortalis guttata*

**Andean Guan** *Penelope montagnii*
Singles at Huambo and Rio Atuen.

**White-winged Guan - E - CR** *Penelope albipennis*
Common at Chaparri with up to 20 seen daily.

**Sickle-winged Guan** *Chamaepetes goudotii*
One seen very well just metres away along the Rio Chido.

**GREBES - Podicipedidae**

**Pied-billed Grebe** *Podilymbus podiceps*
1 at Tinajones and 8 at Laguna Nicolas.

**Great Grebe** *Podiceps major*
3 distantly on Tinajones reservoir.

**IBISES AND SPOONBILLS - Threskiornithidae**

**Puna Ibis** *Plegadis ridgwayi*
About 15 near San José. Several near Cajamarca and at Laguna San Jose.

**HERONS, EGRETS, AND BITTERNS - Ardeidae**

**Rufescent Tiger Heron** *Tigrisoma lineatum*
A juvenile seen in Quebrada Mishquiaquillo.

**Fasciated Tiger Heron** *Tigrisoma fasciatum*
An adult seem well on the Utcubamba river near Pedro Ruiz.

**Black-crowned Night Heron** *Nycticorax nycticorax*
Singles near Monsefue and at Laguna San Nicolas.
Striated Heron  
Common.

**Western Cattle Egret**  
Common.

**Cocoi Heron**  
Several in the lowlands of San Martin.

**Great Egret**  
Common.

**Capped Heron**  
7 seen on the Mayo river near Tingana.

**Little Blue Heron**  
1 adult near San José.

**Snowy Egret**  
Common.

**PELICANS - Pelecanidae**

**Peruvian Pelican - NT**  
Pelecanus thagus
Common on Pacific coast.

**BOOBIES AND GANNETS - Sulidae**

**Blue-footed Booby**  
Sula nebouxii
A few with the Peruvian Boobies off Santa Rosa beach.

**Peruvian Booby**  
Sula variegata
Common offshore at Santa Rosa.

**CORMORANTS AND SHAGS - Phalacrocoracidae**

**Neotropic Cormorant**  
Phalacrocorax brasilianus
Common.

**Guanay Cormorant**  
Leucocarbo bougainvillii
Large numbers (1000+) passing offshore at Santa Rosa beach.

**NEW WORLD VULTURES - Cathartidae**

**Turkey Vulture**  
Cathartes aura
Common.

**Lesser Yellow-headed Vulture**  
Cathartes burrovianus
2 near Rioja.

**Greater Yellow-headed Vulture**  
Cathartes melambrotus
Several in eastern lowlands.

**Black Vulture**  
Coragyps atratus
Common.

**King Vulture**  
Sarcoramphus papa
Single adults at Chaparri and Quebrada Upaquihua.

**Andean Condor - NT**  
Vultur gryphus
An adult male was seen well circling over the road on the drive from Abra Porculla to Jaen.

**HAWKS, EAGLES, AND KITES - Accipitridae**

**Pearl Kite**  
Gampsonyx swainsonii
Great looks at 1 en route to Chaparri.

**Swallow-tailed Kite**  
Elanoides forficatus
Several seen in the lowlands of San Martin.
Snail Kite
Several seen in the lowlands of San Martin.

Double-toothed Kite
1 soaring below Llanteria.

Plumbeous Kite
2 near Moyobamba.

Savanna Hawk
Fairly common in lowlands of Lambayeque.

Roadside Hawk
Common in lowlands east of the Andes.

Harris's Hawk
Several seen at Chaparri.

Variable Hawk
Several seen at various sites.

Black-chested Buzzard-Eagle
Several seen at various sites.

Black-and-chestnut Eagle
Harry saw an adult apparently carrying a chicken at the San Lorenzo trail.

White-throated Hawk
2 distantly in Río Atuen and 1 seen very well below Abra Barro Negro.

Short-tailed Hawk
Several in the east.

RAILS, GALLINULES, AND COOTS - Rallidae

Grey-breasted Crake
A pair calling near Tarapoto did not come into view.

Ocellated Crake
Several calling and Amy and Richard saw a flushed bird fly some distance.

Russet-crowned Crake
Individuals seen on two days near Moyobamba, others heard.

Rufous-sided Crake
Seen near Ríoja and Tarapoto.

Grey-necked Wood Rail
1 seen crossing a rural road near Tarapoto.

Paint-billed Crake
Two seen in a rice field north of Jaen.

Spotted Rail
Two seen and another heard at Tinajones reservoir. Great looks of one completely in the open.

Blackish Rail
1 seen well near Ríoja.

Plumbeous Rail
1 seen very well at Pomacochas lake, 2 near Kuelap and 1 at Cumbe Mayo.

Common Gallinule
Common, seen at several locations.

Purple Gallinule
4 at Tinajones reservoir, several in San Martin lowlands.

Andean Coot
1 near San José, several at Tinajones reservoir.
LIMPIN - Aramidae
Limpkin Aramus guarauna
1 at Tingana and 1 near Rioja.

THICK-KNEES - Burhinidae
Peruvian Thick-knee Burhinus supercilialis
21 seen very well near Santa Rosa, others heard at dusk at Chaparri and Los Faiques.

OYSTERCATCHERS - Haematopodidae
American Oystercatcher Haematopus palliatus
A few on the beach at Santa Rosa.

STILTS AND AVOCETS - Recurvirostridae
Black-necked Stilt Himantopus mexicanus
Fairly common on the coast and at Tinajones reservoir and near Rioja in rice fields.

PLOVERS AND LAPWINGS - Charadriidae
Tawny-throated Dotterel Oreopholus ruficollis
A flock of 24 near Monsefue.
Andean Lapwing Vanellus resplendens
Two on the coast at San José were a very unusual record. Fairly common in highlands.
Grey Plover Pluvialis squatarola
Several on the coast.
Semipalmated Plover Charadrius semipalmatus
Several on the coast.
Killdeer Charadrius vociferus
Common on the coastal fields and wetlands.
Collared Plover Charadrius collaris
3 at Tinajones reservoir and 2 near Tingana.

JACANAS - Jacanidae
Wattled Jacana Jacana jacana
Common in the San Martin lowlands.

SEEDSNIPES - Thinocoridae
Least Seedsnipe Thinocorus ruminivorus
Great looks at a male at Santa Rosa.

SANDPIPERS AND ALLIES - Scolopacidae
Puna Snipe Gallinago andina
About 15 at Pomacochas lake.
Whimbrel Numenius phaeopus
Several on the coast.
Greater Yellowlegs Tringa melanoleuca
1 at Laguna San Nicolas.
Lesser Yellowlegs Tringa flavipes
Several at San José, near Rioja and 1 at Laguna San Nicolas.
Willet Tringa semipalmata
1 on the beach at Santa Rosa.
Spotted Sandpiper  
Common.  
**Actitis macularius**

Ruddy Turnstone  
1 on the beach at Santa Rosa.  
**Arenaria interpres**

Sanderling  
Common on the beach at Santa Rosa.  
**Calidris alba**

Semipalmated Sandpiper - NT  
3 near San José.  
**Calidris pusilla**

Western Sandpiper  
1 near San José.  
**Calidris mauri**

Least Sandpiper  
Common on pools near San José.  
**Calidris minutilla**

Baird's Sandpiper  
Several in fields and around pools on coast, a flock of 8 between Cajamarca and Celendin and several at Laguna San Nicolas.  
**Calidris bairdii**

Pectoral Sandpiper  
1 near San José.  
**Calidris melanotos**

Stilt Sandpiper  
5 on pools near San José and 1 at Laguna San Nicolas.  
**Calidris himantopus**

Wilson's Phalarope  
Common on pools near San José.  
**Phalaropus tricolor**

GULLS, TERNS, AND SKIMMERS - Laridae

Andean Gull  
1 on coast, 1 in Rio Atuen valley, 10 at Laguna San Nicolas.  
**Chroicocephalus serranus**

Grey-headed Gull  
Common on coast.  
**Chroicocephalus cirrocephalus**

Grey Gull  
4 seen on Santa Rosa beach.  
**Leucophaeus modestus**

Kelp Gull  
Common on coast.  
**Larus dominicanus**

Royal Tern  
1 offshore at Santa Rosa.  
**Thalasseus maximus**

Common Tern  
2 offshore at Santa Rosa.  
**Sterna hirundo**

South American Tern  
20+ offshore at Santa Rosa going south.  
**Sterna hirundinacea**

Large-billed Tern  
4 on the Huallaga River.  
**Phaetusa simplex**

Inca Tern - NT  
100+ offshore at Santa Rosa and an immature on the village beach there,  
**Larosterna inca**

PIGEONS AND DOVES - Columbidae

Rock Dove - I  
This introduced species is common in towns and cities.  
**Columba livia**

Scaled Pigeon  
2 near Aguas Verdes.  
**Patagioenas speciosa**

Band-tailed Pigeon  
Several in highlands and a flock of 30+ in Quebrada Mishquiahuiluillo was exceptionally low.  
**Patagioenas fasciata**
**Pale-vented Pigeon**
Several near Tingana.

**Maranon Pigeon - VU**
2 above Jaen, 1 above Tamborapa, 1 at Gocta and 3 at Balsas.

**Plumbeous Pigeon**
Several seen in the lowlands of San Martin.

**Ruddy Pigeon - VU**
2 on the trail above Llanteria.

**Plain-breasted Ground Dove**
1 seen near Moyobamba.

**Ecuadorian Ground Dove**
Several near Jaen.

**Ruddy Ground Dove**
Several in lowlands of San Martin.

**Croaking Ground Dove**
Common west of the Andes and fairly common in the Marañón valley.

**Blue Ground Dove**
Fairly common in lowlands of San Martin.

**Bare-faced Ground Dove**
Several on the road from Abra Porculla to Jaen and above Balsas.

**White-tipped Dove**
Common.

**Ochre-bellied Dove - VU**
1 flew across the road at Casupe and others were heard calling.

**Eared Dove**
Common.

**West Peruvian Dove**
Common in the coastal lowlands.

---

**HOATZIN - Opisthocomidae**

**Hoatzin**
Several on the Río Huallaga near Tarapoto.

---

**CUCKOOS - Cuculidae**

**Smooth-billed Ani**
Common in the San Martin lowlands.

**Groove-billed Ani**
Common in arid lowlands and the Marañón valley.

**Greater Ani**
2 at Quebrada Upaquihua.

**Striped Cuckoo**
Commonly heard in open and scrubby habitats in drier areas.

**Little Cuckoo**
1 at Tingana.

**Squirrel Cuckoo**
Fairly common.

**Dark-billed Cuckoo**
1 seen near Llanteria,
Western Barn Owl
Heard at Moro Calzada.

**BARN-OWLS - Tytonidae**

Tyto alba

**OWLS - Strigidae**

Tropical Screech Owl
Several heard and one seen well near Tarapoto.

West Peruvian Screech Owl
At least 3 of the pacificus subspecies seen at Chaparri and others heard. A single of the nominate form was seen well at Gocta.

Koepcke’s Screech Owl
2 seen well at their day roost in the Utcubamba valley.

Cinnamon Screech Owl
Heard at Abra Patricia. Despite getting very close it remained hidden, perhaps due to the full moon.

Napo Screech Owl
1 seen very well near Moyobamba.

White-throated Screech Owl
Heard at Abra Patricia and seen in flight by Rob.

Rufous-banded Owl
Heard at Abra Patricia.

Band-bellied Owl
2 seen at Waqanki lodge.

Andean Pygmy Owl
Heard at Abra Patricia.

Ferruginous Pygmy Owl
Common in San Martin lowlands.

Pacific Pygmy Owl
Common by voice and a few seen at Chaparri, Casupe, Pomac.

Long-whiskered Owlet - E - EN
2 seen at Abra Patricia.

Burrowing Owl
Common on coastal plain and 1 of the Amazonian subspecies seen near Moyobamba.

Crested Owl
Heard along the Rio Huallaga.

Spectacled Owl
Heard along the Rio Huallaga.

Buff-fronted Owl
Calls heard near Gocta Lodge in response to playback seem to fit this species, unfortunately the bird could not be seen.

Stygian Owl
Great looks at a male in display flight, wing-clapping over our heads.

Short-eared Owl
Great looks at 1 at Santa Rosa.

**OILBIRD - Steatornithidae**

Steatornis caripensis

Oilbird
41 seen at a breeding ravine near Moyobamba.
**POTOOS - Nyctibiidae**

*Long-tailed Potoo*  
*Nyctibius aethereus*  
1 seen superbly at day roost and KONABIKH on the Cordillera Escapar.

**NIGHTJARS AND ALLIES - Caprimulgidae**

*Lesser Nighthawk*  
*Chordeiles acutipennis*  
1 seen at Los Faiques and 5 flushed in daylight at Chamaya.

*Rufous-bellied Nighthawk*  
*Lurocalis rufiventris*  
Heard at Abra Patricia.

*Blackish Nightjar*  
*Nyctipolus nigrescens*  
2 seen, one very well, at Moro Calzada.

*Pauraque*  
*Nyctidromus albicollis*  
1 seen and several heard at Wakanqui.

*Anthony's Nightjar*  
*Nyctidromus anthonyi*  
1 heard at Chaparri and 1 seen briefly at Los Faiques.

*Tschudi's Nightjar*  
*Systellura decussatus*  
A male seen well at Chaparri. This is a recent split from Band-winged Nightjar.

*Lyre-tailed Nightjar*  
*Uropsalis lyra*  
A male seen well perched and in flight silhouetted against the dawn sky above Venceremos.

*Spot-tailed Nightjar*  
*Hydropsalis maculicaudus*  
Heard and seen briefly at Waqanki.

*Scissor-tailed Nightjar*  
*Hydropsalis torquata*  
1 female flushed in daytime near Moyobamba.

*Rufous Nightjar*  
*Antrostomus rufus*  
Seen well in flight and heard at Moro Calzada and others heard at Waqanki.

**SWIFTS - Apodidae**

*White-chinned Swift*  
*Cypseloides cryptus*  
A flock of about 30 near Garcia.

*Chestnut-collared Swift*  
*Streptoprocne rutila*  
A flock of about 40 below Abra Patricia. Smaller numbers on several other days.

*White-collared Swift*  
*Streptoprocne zonaris*  
Common in Andes.

*Pale-rumped Swift*  
*Chaetura egregia*  
About 10 at Aguas Verdes.

*Grey-rumped Swift*  
*Chaetura cinereiventris*  
1 of the *occidentalis* subspecies seen at Abra Porculla was an unusual record. About 20 of the nominate at Aguas Verdes.

*Short-tailed Swift*  
*Chaetura brachyura*  
Several in the eastern lowlands.

*White-tipped Swift*  
*Aeronautes montivagus*  
1 at Abra Porculla and several at Abra Patricia and Gocta.

*Neotropical Palm Swift*  
*Tachornis squamata*  
Common in eastern lowlands.

**HUMMINGBIRDS - Trochilidae**

*White-tipped Sicklebill*  
*Eutoxeres aquila*  
1 dashed past on the Cordillera Escalera.

*Buff-tailed Sicklebill*  
*Eutoxeres condamini*  
1 heard and glimpsed in Quebrada Mishquiaquillo.
| **Rufous-breasted Hermit**                      | *Glaucis hirsutus*          |
| A few seen in eastern foothills.                 |
| **Green Hermit**                                 | *Phaethornis guy*           |
| Fairly common in eastern foothills.              |
| **Great-billed Hermit**                          | *Phaethornis malaris*       |
| 3 seen.                                           |
| **Tawny-bellied Hermit**                         | *Phaethornis syrmatophorus* |
| 1 seen well at Venceremos.                       |
| **Koepcke's Hermit - E - NT**                    | *Phaethornis koepckeae*     |
| 5+ seen at KONABIKH.                             |
| **Reddish Hermit**                               | *Phaethornis ruber*         |
| Several seen.                                    |
| **Black-throated Hermit**                        | *Phaethornis atrimentalis*  |
| Singles at Aguas Verdes and Waqanki.             |
| **Grey-chinned Hermit**                          | *Phaethornis griseogularis* |
| Several of the *porculla* subspecies (sometimes considered a separate species Porculla Hermit) seen at Casupe and one at Abra Porculla. Individuals of the *zonura* subspecies were seen at several sites in the eastern Andes. |
| **Green-fronted Lancebill**                      | *Doryfera ludovicae*        |
| Several seen in eastern foothills.               |
| **Blue-fronted Lancebill**                       | *Doryfera johannae*         |
| 3 seen in eastern foothills.                     |
| **Grey-breasted Sabrewing**                      | *Campylopterus largipennis* |
| Fairly common in eastern foothills.              |
| **White-necked Jacobin**                         | *Florisuga mellivora*       |
| Common in eastern foothills.                     |
| **Brown Violetear**                              | *Colibri delphinae*         |
| 2 seen.                                          |
| **Green Violetear**                              | *Colibri thalassinus*       |
| Common on east slope of Andes.                   |
| **Sparkling Violetear**                          | *Colibri coruscans*         |
| Common in Andes.                                 |
| **Black-throated Mango**                         | *Anthracotherax nigricollis*|
| 2 seen.                                          |
| **Violet-headed Hummingbird**                    | *Klais guimeti*             |
| 1 at Cordillera Escalera (leader only).          |
| **Rufous-crested Coquette**                      | *Lophornis delattrei*       |
| An immature male at Arena Blanca and an adult male at Waqanki. |
| **Wire-crested Thorntail - NT**                  | *Discosura popelairii*      |
| 2 males at Arena Blanca.                         |
| **Blue-tailed Emerald**                          | *Chlorostilbon mellisugus*  |
| Several seen in eastern lowlands.                |
| **Fork-tailed Woodnymph**                        | *Thalurania furcata*        |
| Fairly common in eastern foothills.              |
| **White-chinned Sapphire**                       | *Hylocharis cyanus*         |
| 2 at Quebrada Upaquihua and 1 at Waqanki.        |
| **Golden-tailed Sapphire**                       | *Chrysuronia oenone*        |
| Fairly common in eastern foothills.              |
| **Tumbes Hummingbird - NE**                      | *Leucippus baeri*           |
| Several at Chaparri.                             |
Spot-throated Hummingbird - NE
A few near Jaen.

Many-spotted Hummingbird
3 seen.

White-bellied Hummingbird
Several at Huembo.

Amazilia Hummingbird - NE
Common on west slope of the Andes at Chaparri, Casupe, Pomac and 1 in Cajamarca.

Andean Emerald
Common at Huembo.

Glittering-throated Emerald
3 seen.

Sapphire-spangled Emerald
Several in eastern foothills.

Speckled Hummingbird
Fairly common.

Ecuadorian Piedtail - NT
2 at Llanteria feeders.

Black-throated Brilliant
1 at Arena Blanca.

Fawn-breasted Brilliant
Several at Abra Patricia.

Violet-fronted Brilliant
At least 3 at Huembo.

Chestnut-breasted Coronet
Common at Huembo.

Shining Sunbeam
Common at treeline.

Andean Hillstar
1 between Celendin and Cajamarca and 1 at Cumbe Mayo.

Mountain Velvetbreast
1 female in the Rio Atuen valley.

Bronzy Inca
At least 2 at Huembo.

Collared Inca
Fairly common at Abra Patricia.

Violet-throated Starfrontlet
3 of the dichroura subspecies on the San Lorenzo trail.

Rainbow Starfrontlet - NE
Several at Kuelap, Rio Atuen and below Abra Barro Negro.

Sword-billed Hummingbird
5 seen.

Great Sapphirewing
1 below Abra Barro Negro.

Giant Hummingbird
1 between Celendin and Cajamarca.

Amethyst-throated Sunangel
1 on the San Lorenzo trail.

Purple-throated Sunangel - NE
Several near Kuelap, Rio Atuen and Abra Barro Negro.
Royal Sunangel - NE - EN
1 male seen well below Abra Patricia.

Sapphire-vented Puffleg
3 below Abra Barro Negro.

Emerald-bellied Puffleg
Fairly common at Abra Patricia.

Greenish Puffleg
3 near Alto Nieva.

Booted Racket-tail
About 10 seen.

Black-tailed Trainbearer
5 seen.

Green-tailed Trainbearer
4 seen.

Tyrian Metaltail
Common.

Coppery Metaltail - E
2 at Abra Barro Negro.

Black Metaltail - E
Several in Rio Chonta valley and at Cumbe Mayo.

Grey-bellied Comet - E - EN
1 male seen well in the Rio Chonta valley.

Long-tailed Sylph
3 at San Lorenzo.

Marvelous Spatuletail - E - EN
At least 5 males in various stages of tail growth and 2 females at Huembo.

Long-billed Starthroat
4 at Casupe.

Oasis Hummingbird - NE
1 flyby at Santa Rosa was sadly leader only.

Peruvian Sheartail - NE
Several immature/females at Chaparri, Pomac and Abra Porculla.

Purple-collared Woodstar
Common at Chaparri and Abra Porculla.

Short-tailed Woodstar
A couple at Chaparri and Pomac.

White-bellied Woodstar
Common.

Little Woodstar - VU
A very obliging female seen well at Huambo and 1 at Gocta.

Golden-headed Quetzal
2 seen at Abra patricia and 2 more at the Rio Atuen valley.

Green-backed Trogon
3 seen in eastern lowlands.

Blue-crowned Trogon
5 seen in eastern lowlands.

Ecuadorian Trogon
1 male seen well at Casupe.

TROGONS - Trogonidae

Golden-headed Quetzal
Pharomachrus auriceps

Green-backed Trogon
Trogon viridis

Blue-crowned Trogon
Trogon curucui

Ecuadorian Trogon
Trogon mesurus
Collared Trogon  
1 at Cordillera Escalera.

Masked Trogon  
2 at Abra Patricia, including a male giving a very unusual 5 note call.

KINGFISHERS - Alcedinidae

Green-and-rufous Kingfisher  
Several seen well at Tingana.

American Pygmy Kingfisher  
Heard at Tingana.

Green Kingfisher  
Several at Tingana.

Amazon Kingfisher  
1 near Jaen. Common along the Mayo river and at Tingana.

Ringed Kingfisher  
1 at Chaparri along the stream near the lodge.

MOTMOTS - Momotidae

Rufous Motmot  
Heard at Quebrada Mishquiaquillo.

Broad-billed Motmot  
Heard at Quebrada Mishquiaquillo.

JACAMARS - Galbulidae

Bluish-fronted Jacamar  
Several in the lowlands of San Martin.

PUFFBIRDS - Bucconidae

Rufous-capped Nunlet  
One seen very well at Quebrada Upaquihua.

White-faced Nunbird  
Heard at Abra Patricia.

Black-fronted Nunbird  
Several in the lowlands of San Martin.

White-fronted Nunbird  
A juvenile near Llanteria.

NEW WORLD BARBETS - Capitonidae

Gilded Barbet  
Several in the lowlands of San Martin.

Versicolored Barbet - NT  
A female with a flock near Llanteria.

TOUCANS - Ramphastidae

Black-throated Toucanet  
1 at Huembo.

Chestnut-eared Aracari  
Several in the lowlands of San Martin.

Golden-collared Toucanet  
A pair seen in Quebrada Mishquiaquillo.
Grey-breasted Mountain Toucan - NT
Heard at Abra Patricia, 2 seen in Rio Atuen valley.

Channel-billed Toucan
About 5 at Quebrada Mishquiaquillo.

White-throated Toucan
Heard in eastern lowlands.

WOODPECKERS - Picidae

Ecuadorian Piculet
1 at Casupe.

Speckle-chested Piculet - E - VU
1 seen and others heard at Huembo.

Yellow-tufted Woodpecker
Several in eastern lowlands.

Smoky-brown Woodpecker
1 near Rioja.

Scarlet-backed Woodpecker
Several at Chaparri. An adult and very recently fledged juvenile above Tamborapa.

Little Woodpecker
5 seen in eastern lowlands.

Red-stained Woodpecker
1 seen above Affluent.

White-throated Woodpecker
1 seen well at Quebrada Mishquiaquillo.

Golden-olive Woodpecker
A couple heard at Chaparri and 1 seen well at Tucume.

Crimson-mantled Woodpecker
Heard at Abra Patricia.

Black-necked Woodpecker - E
1 seen well in Utcubamba valley.

Spot-breasted Woodpecker
3 seen in eastern lowlands.

Andean Flicker
Common in highlands.

Lineated Woodpecker
Several seen.

Powerful Woodpecker
Heard on the San Lorenzo trail.

Crimson-crested Woodpecker
1 seen well at Llanteria.

FALCONS AND CARACARAS - Falconidae

Black Caracara
Several in the lowlands of San Martin.

Mountain Caracara
Fairly common in the highlands of Amazonas and Cajamarca.

Northern Crested Caracara
Several in the coastal lowlands.

Yellow-headed Caracara
Several in the lowlands of San Martin.
Barred Forest Falcon  
Heard at Abra Patricia.

American Kestrel  
Common.

Aplomado Falcon  
A pair in the Rio Atuen seen well, 1 near Celendin and 1 at Cumbe Mayo.

Bat Falcon  
1 near Moyobamba.

Peregrine Falcon  
1 hunting over pools near San José on the coast.

African & New World Parrots - Psittacidae

Spot-winged Parrotlet - VU  
Tout stictopterus
Three flocks of 8 to 30 seen over Quebrada Mishquiaquillo, including one seen quite close and low.

Barred Parakeet  
Bolborhynchus lineola
A flock of about 30 over Llanteria.

Cobalt-winged Parakeet  
Brotogeris cyanoptera
Common in eastern lowlands, including very good looks at 2 of the gustavi subspecies in Quebrada Upaniquiha.

White-winged Parakeet  
Brotogeris versicolorus
100+ in several flocks in Huallaga valley.

Red-billed Parrot  
Pionus sordidus
Several in the eastern foothills.

Plum-crowned Parrot  
Pionus tumultuosus
A few at Abra Patricia and a flock of 34 at Kuelap.

Blue-headed Parrot  
Pionus menstruus
Common in eastern lowlands.

Scaly-naped Amazon  
Amazona mercenarius
Several at Abra Patricia.

Southern Mealy Amazon  
Amazona farinosa
4 near Tingana.

Blue-winged Parrotlet  
Forpus xanthopterygius
2 at Quebrada Upaniquiha, 6 near Aguas Verdes.

Pacific Parrotlet  
Forpus coelestis
Common in western lowlands and a few near Jaen.

Yellow-faced Parrotlet - E - VU  
Forpus xanthops
9 seen well at Balsas.

Scarlet-fronted Parakeet  
Psittacara wagleri
Two flocks in flight at Tamborapa.

Mitred Parakeet  
Psittacara mitratus
Several flocks at Huambo.

Red-masked Parakeet  
Psittacara erythrogenys
Several flocks seen and more heard distantly at Chaparri.

White-eyed Parakeet  
Psittacara leucophthalmus
Common in eastern lowlands.

Red-bellied Macaw  
Orthopsittaca manilatus
4 along the Mayo river near Tingana.

</table>

Amazing! An apparently stunned individual sitting in the road above Tamborapa at dawn was picked up and recovered to fly off seemingly OK. Another seen briefly in the understory.

The *maculata* subspecies was seen at Chaparri and Pomac. The *chinchipensis* subspecies (sometimes considered a separate species: Chichipe Spinetail) was seen above Tamborapa.

A few heard and 1 seen briefly at Q Marañón Spinetail - NE - VU

About 10 individuals at Abra Porculla.

Several seen and heard in Cajamarca highlands.

Many heard and a few seen near Jaen and Moyobamba. One in the hand after it flew into the dining room at Seizo’s at dinner.

3 seen well near Hacienda Limon in the mid Marañón valley.

1 seen near Santa Rosa and 5+ seen and others heard at Laguna San Nicolas.
Equatorial Greytail - NT
1 near Llanteria.

Spotted Barbtail
1 at Abra Patricia.

Pearled Treerunner
Fairly common.

Streaked Tuftedcheek
4 seen.

Montane Foliage-gleaner
3 seen near Abra Patricia.

Lineated Foliage-gleaner
2 seen near Llanteria.

Buff-browed Foliage-gleaner
8 seen near Llanteria.

Rufous-necked Foliage-gleaner - VU
1 at Abra Porculla.

Dusky-cheeked Foliage-gleaner
Heard at Quebrada Mishquiaquillo.

Rufous-rumped Foliage-gleaner
5 of the montane ochrogaster subspecies seen near Llanteria.

Striped Treehunter
Heard at Abra Patricia.

Peruvian Treehunter
Heard at San Lorenzo.

Buff-throated Foliage-gleaner
Heard at Quebrada Mishquiaquillo.

Henna-hooded Foliage-gleaner - VU
1 seen very well at Abra Porculla, and several heard at Casupe.

Streaked Xenops
Fairly common.

Tyrannine Woodcreeper
1 at Abra Patricia.

Olivaceous Woodcreeper
4 seen.

Strong-billed Woodcreeper
4 seen and more heard at Abra Patricia.

Amazonian Barred Woodcreeper
1 seen at Tingana.

Ocellated Woodcreeper
1 at Quebrada Mishquiaquillo.

Buff-throated Woodcreeper
Fairly common in eastern lowlands.

Olive-backed Woodcreeper
3 below Abra Patricia.

Streak-headed Woodcreeper
2 seen well at Chaparri and 2 at Pomac.

Montane Woodcreeper
10 at Abra Patricia.

Cinnamon-throated Woodcreeper
2 seen in eastern lowlands, including one at nest in roof of Tingana dining room.
**Straight-billed Woodcreeper**  
*Dendroplex picus*  
3 at Quebrada Upaquihua.

**Long-billed Woodcreeper**  
*Nasica longirostris*  
Heard at Tingana.

**Inambari Woodcreeper**  
*Lepidocolaptes fatimalimae*  
2 seen in Quebrada Mishquiaquillo.

---

**ANTBIRDS - Thamnophilidae**

**Great Antshrike**  
*Taraba major*  
Several seen near Jaen and in the Huallaga valley.

**Collared Antshrike**  
*Thamnophilus bernardi*  
Several of the nominate subspecies seen at Chaparri. The *shumbae* subspecies was seen at Chamaya and above Jaen.

**Barred Antshrike**  
*Thamnophilus doliatus*  
10+ seen in Quebrada Upaquihua. Heard in other locations.

**Chapman's Antshrike - NE**  
*Thamnophilus zarumae*  
Great looks at a female and brief views of a male at Abra Porculla.

**Lined Antshrike - VU**  
*Thamnophilus tenuepunctatus*  
1 seen and others heard near Llanteria.

**Uniform Antshrike**  
*Thamnophilus unicolor*  
Heard at Abra Patricia.

**Northern Slaty Antshrike**  
*Thamnophilus punctatus*  
A male of the *leucogaster* subspecies (sometimes split as Marañón Slaty Antshrike) was seen well above Jaen. Several of the *huallagae* subspecies (sometimes split as Huallaga Slaty Antshrike) were seen in the Huallaga valley.

**Rufous-capped Antshrike**  
*Thamnophilus ruficapillus*  
2 at San Lorenzo trail and good looks at 1 near Gocta.

**Plain Antvireo**  
*Dysithamnus mentalis*  
3 seen.

**Rufous-tailed Antwren**  
*Epinecrophylla erythrura*  
2 seen on Cordillera Escalera.

**White-flanked Antwren**  
*Myrmotherula axillaris*  
3 seen at KONABIKH.

**Ash-throated Antwren - E - EN**  
*Herpsilochmus parkeri*  
3 birds seen, including great looks at a singing male.

**Yellow-breasted Antwren - VU**  
*Herpsilochmus axillaris*  
2 pairs seen below Abra Patricia.

**??**  
*Herpsilochmus sp.*  
Good views obtained of the unidentified *Herpsilochmus* antwren in the Huallaga valley for the second year running.

**Dot-winged Antwren**  
*Microrhopias quixensis*  
1 at KONABIKH.

**Streak-headed Antbird**  
*Drymophila striaticeps*  
Common at Abra Patricia, many heard and several seen well.

**Chestnut-shouldered Antwren**  
*Terenura humeralis*  
1 seen well at Quebrada Upaquihua was a surprise.

**White-backed Fire-eye**  
*Pyriglena leuconota*  
1 seen near Llanteria.

**White-browed Antbird**  
*Myrmoborus leuophrys*  
Good views of the white-crowned *koenigorum* subspecies at Quebrada Upaquihua.
### Black-faced Antbird
4 at KONABIKH.

### Peruvian Warbling Antbird
1 seen at Quebrada Upaquiquiahu.

### Northern Chestnut-tailed Antbird
1 seen well and others heard at Quebrada Upaquiquiahu.

### Southern Chestnut-tailed Antbird
Heard at Arena Blanca Reserve.

### White-plumed Antbird
1 heard and seen briefly at Quebrada Mishquiaquillo.

### Hairy-crested Antbird
Heard at Quebrada Mishquiaquillo.

### Southern Chestnut-tailed Antbird
1 seen at Quebrada Upaquiquiahu.

### Grey Antbird
1 seen at Quebrada Upaquiquiahu.

### Band-tailed Antbird
1 seen and several heard at Tingana.

### Silvered Antbird
1 seen and several heard at Tingana.

### ANTTHRUSHES - Formicariidae

#### Barred Anthrash
Heard distantly at Abra Patricia.

### ANTPITTAS - Grallariidae

#### Undulated Antpitta
Heard at Abra Barro Negro.

#### Scaled Antpitta
Several heard at Quebrada Mishquiaquillo.

#### Chestnut-crowned Antpitta
3 seen at Abra Porculla. Heard at several locations.

#### Watkins's Antpitta - NT
1 seen at Abra Porculla.

#### Stripe-headed Antpitta
1 seen very well at Cumbe Mayo.

#### Pale-billed Antpitta - E
An adult and an immature seen on the San Lorenzo trail.

#### Rusty-tinged Antpitta - E - VU
2 seen at Abra Patricia, also 1 dashed across the San Lorenzo trail.

#### Rufous Antpitta
1 of the cajamarcae subspecies seen near Cruz Conga.

#### Ochre-breasted Antpitta - NT
Heard near Llanteria.

#### Ochre-fronted Antpitta - E - EN
2 seen well below Abra Patricia, 2 others heard.

#### Rusty-breasted Antpitta
1 of the leymbambae subspecies seen below Abra Barro Negro.
TAPACULOS - Rhinocryptidae

Northern White-crowned Tapaculo
Several heard in eastern foothills.
*Scytalopus atratus*

Rufous-vented Tapaculo - E
Several heard in eastern foothills.
*Scytalopus femoralis*

Trilling Tapaculo
Heard on the San Lorenzo trail.
*Scytalopus parvirostris*

Blackish Tapaculo
Heard on the San Lorenzo trail.
*Scytalopus latrans*

Unicoloured Tapaculo
1 seen below Abra Gavilan.
*Scytalopus unicolor*

CRESCENTCHESTS - Melanopareiidae

Marañon Crescentchest - NT
A male seen very well above Jaen and a couple of others heard. 2 more seen near Tamborapa.
*Melanopareia maranonica*

Elegant Crescentchest
2 seen well in Chaparri and others heard, also at Casupe and Abra Porculla.
*Melanopareia elegans*

TYRANT FLYCATCHERS - Tyrannidae

Wing-barred Piprites
Heard at Quebrada Misquiaquillo.
*Piprites chloris*

Sooty-headed Tyrannulet
1 near Llanteria.
*Phylloscopus griseiceps*

Plumbeous-crowned Tyrannulet
2 near Llanteria.
*Phylloscopus plumbeiceps*

Tawny-rumped Tyrannulet
1 seen well in the Rio Atuen valley.
*Phylloscopus uropygialis*

Yellow-crowned Tyrannulet
Heard several times near Moyobamba.
*Tyrannulus elatus*

Greenish Elaenia
2 seen at Quebrada Upaquihua.
*Myiopagis viridicata*

Forest Elaenia
2 seen and heard near Moyobamba.
*Myiopagis gaimardii*

Pacific Elaenia
Several at Casupe.
*Myiopagis subplacens*

Yellow-bellied Elaenia
Several in arid habitats.
*Elaenia flavogaster*

Small-billed Elaenia
1 seen near Moyobamba.
*Elaenia parvirostris*

Sierran Elaenia
Common in highlands.
*Elaenia pallatangae*

Large Elaenia
1 at Quebrada Upaquihua.
*Elaenia spectabilis*

Southern Beardless Tyrannulet
Common in lowlands. Several subspecies seen.
*Camptostoma obsoletum*

White-throated Tyrannulet
2 at Abra Barro Negro.
*Mecocerculus leucophrys*

White-tailed Tyrannulet
Several seen.
*Mecocerculus poecilobicercus*
Sulphur-bellied Tyrannulet
1 seen near Garcia.

White-banded Tyrannulet
One on the San Lorenzo trail. 2 near Abra Barro Negro.

Yellow-billed Tit-Tyrant
4 seen.

Tufted Tit-Tyrant
4 seen.

Torrent Tyrannulet
Several seen on fast flowing streams.

Mouse-colored Tyrannulet
Subspecies inflava seen on the coast and subspecies maranoica in the Marañón valley and subspecies wagae in eastern lowlands.

Rufous-headed Pygmy Tyrant
2 heard at Abra Patricia.

Tawny-crowned Pygmy Tyrant
Several at Chaparri and Pomac and 1 at Balsas.

Grey-and-white Tyrannulet
Common at dry forest sites in the coastal foothills and lowlands.

Mishana Tyrannulet - E - VU
2 seen and others heard at Waqanki.

Peruvian Tyrannulet - E
8 seen in Eastern lowlands and foothills.

Variegated Bristle Tyrant
1 seen near Llanteria.

Marble-faced Bristle Tyrant
4 near Llanteria.

Spectacled Bristle Tyrant
1 seen very well near Llanteria.

Mottle-cheeked Tyrannulet
1 seen well at Alto Nieva.

Ecuadorian Tyrannulet - NT
1 seen well at Llanteria.

Streak-necked Flycatcher
A few below Abra Patricia.

Olive-striped Flycatcher
A few in eastern foothills.

Ochre-bellied Flycatcher
2 seen in eastern foothills.

McConnell's Flycatcher
1 at Cordillera Escalera (leader only).

Sepia-capped Flycatcher
Several in eastern foothills.

Slaty-capped Flycatcher
Fairly common in eastern Andes.

Inca Flycatcher - E - NT
4 seen at Abra Patricia.

Olive-chested Flycatcher
1 at Quebrada Mishquiaquillo and 2 in the middle Marañón valley.

Eastern Wood Pewee  
1 seen at Cordillera Escalera.

Tropical Pewee  
Several of the punensis subspecies seen on west slope and Marañón valley.

Vermilion Flycatcher  
Common west of Andes and in Marañón valley.

Rufous-tailed Tyrant  
6 at Abra Patricia and 1 at Cordillera Escalera.

White-winged Black Tyrant  
2 en route to Celendin.

Spot-billed Ground Tyrant  
6+ near Cajamarca.

Rufous-naped Ground Tyrant  
15+ near Cajamarca.

White-browed Ground Tyrant  
20+ near Cajamarca.

Black-billed Shrike-Tyrant  
Fairly common in Cajamarca highlands.

White-tailed Shrike-Tyrant - VU  
1 seen at Cumbe Mayo.

Streak-throated Bush Tyrant  
1 seen at Abra Porculla.

Rufous-webbed Bush Tyrant  
Fairly common in Cajamarca highlands.

Tumbes Tyrant - E - NT  
3 at Chaparri.

Jelski's Chat-Tyrant  
2 en route to Celendin.

Slaty-backed Chat-Tyrant  
2 seen.

Rufous-breasted Chat-Tyrant  
Fairly common in highlands.

Brown-backed Chat-Tyrant  
Several in humid highlands near treelike.

White-browed Chat-Tyrant  
Several in arid highlands.

Piura Chat-Tyrant - E - NT  
1 at Abra Porculla.

Long-tailed Tyrant  
1 near Affluent and another at Tingana.

Short-tailed Field Tyrant  
1 seen well at Tinajones and a couple at Chaparri.

Piratic Flycatcher  
Heard near Moyobamba.

Social Flycatcher  
Fairly common in lowlands of San Martin.

Great Kiskadee  
Common in the San Martin lowlands.

Lemon-browed Flycatcher - VU  
Several near Aguas Verdes.
Tropical Kingbird  
*Tyrannus melancholicus*  
Common.  

Eastern Kingbird  
*Tyrannus tyrannus*  
1 along the Mayo River near Tingana.  

Rufous Flycatcher - E - EN  
2 at Chaperri and 4+ at Bosque de Pomac.  

Swainson's Flycatcher  
*Myiarchus semirufus*  

Drab Water-Tyrant  
*Ochthornis littoralis*  
1 along Mayo river.  

Dull-capped Attila  
*Attila bolivianus*  
1 below Llanteria was an unusual field.  

---  

**COTINGAS - Cotingidae**  

Red-crested Cotinga  
*Ampelion rubrocristatus*  
Several seen in highlands.  

Peruvian Plantcutter - E - EN  
*Phytotoma raimondii*  
1 male seen well at Bosque de Pomac.  

Green-and-black Fruiteater  
*Pipreola riefferii*  
3 seen.  

Barred Fruiteater  
*Pipreola arcuata*  
Heard.  

Fiery-throated Fruiteater - NT  
*Pipreola chlorolepidota*  
A female seen feeding and on a nest at Quebrada Mishquiaquillo.  

Andean Cock-of-the-rock  
*Rupicola peruvianus*  
Fairly common near Llanteria.  

Red-ruffed Fruitcrow  
*Pyroderus scutatus*  
1 seen well but briefly at Arena Blanca Reserve.  

---  

**MANAKINS - Pipridae**  

Sulphur-bellied Tyrant-Manakin  
*Neopelma sulphureiventer*  
1 near Shapaja and 4 at Quebrada Upaquihua.  

Dwarf Tyrant-Manakin  
*Tyranneutes stolzmanni*  
1 seen well on the Cordillera Escalera.  

Golden-winged Manakin  
*Masius chrysopterus*  
1 at Llanteria.  

Fiery-capped Manakin  
*Machaeropterus pyrocephalus*  
Heard at KONABIKH.  

Blue-rumped Manakin - NT  
*Lepidothrix isidorei*  
2 males of the white-crowned and rumped “Milky-rumped” *leucopygia* subspecies seen at Quebrada Mishquiaquillo.  

Golden-headed Manakin  
*Dixiphia erythrocephala*  
7 males seen lekking at KONABIKH.  

---  

**TITYRAS, BECARDS - Tityridae**  

Masked Tityra  
*Tityra semifasciata*  
4 seen near Tingana.  

Black-crowned Tityra  
*Tityra inquisitor*  
2 seen near Tingana.

DONACOBIUS - Donacobiidae

Black-capped Donacobius  
*Donacobius atricapilla*
Several near Tingana and Moyobamba.

WRENS - Troglodytidae

Fasciated Wren  
*Campylorhynchus fasciatus*
Common west of the Andes and in the Marañón valley.

Thrush-like Wren  
*Campylorhynchus tordinus*
Fairly common in eastern lowlands.

Peruvian Wren - E  
*Cinnycerthia peruana*
Several at Abra Patricia and Harry saw 1 below Abra Barro Negro.

Sedge Wren  
*Cistothorus platensis*
2 heard and seen at Abra Barro Negro.

Plain-tailed Wren  
*Pheugopedius euophrys*
2 seen on San Lorenzo trail and 2 heard in the Rio Atuen valley.

Coraya Wren  
*Pheugopedius coraya*
Heard in eastern lowlands.

Speckle-breasted Wren  
*Pheugopedius sclateri*
2 seen at Casupe were of the *paucimaculatus* subspecies. 2 heard near Tamborapa were of the *sclateri* subspecies.

Superciliated Wren  
*Cantorchilus superciliaris*
Common at Chaparri, a few at Casupe, Pomac and Abra Porculla.

House Wren  
*Troglodytes aedon*
Common and widespread.

Mountain Wren  
*Troglodytes solstitialis*
Heard commonly and a few seen.

Grey-breasted Wood Wren  
*Henicorhina leucophrys*
Common by voice and ……

Bar-winged Wood Wren - NT  
*Henicorhina leucoptera*
1 seen at Alto Nieva.

Southern Nightingale-Wren  
*Microcerculus marginatus*
Heard at Quebrada Mishquiaquillo.

Chestnut-breasted Wren  
*Cyphorhinus thoracicicus*
Heard at Abra Patricia and near Llanteria.

Musician Wren  
*Cyphorhinus arada*
Heard at Tingana.

GNATCATCHERS - Polioptilidae

Tropical Gnatcatcher  
*Polioptila plumbea*
The *bilineata* subspecies was common west of the Andes and the *maior* subspecies in the Marañón valley.

MOCKINGBIRDS AND THRASHERS - Mimidae

Long-tailed Mockingbird  
*Mimus longicaudatus*
Common in the coastal lowlands and Marañón valley.

THRUSHES AND ALLIES - Turdidae

Andean Solitaire  
*Myadestes ralloides*
Commonly heard and several seen in eastern Andes.

</table>
Plumbeous Euphonia  
1 female seen on the Cordillera Escalera.  

**Bronze-green Euphonia**  
Fairly common in eastern foothills.  

**White-vented Euphonia**  
7 in eastern foothills.  

**Orange-bellied Euphonia**  
Fairly common in eastern lowlands.  

**Blue-naped Chlorophonia**  
2 at Cordillera Escalera.  

**Chestnut-breasted Chlorophonia**  
2 briefly at Abra Patricia.  

---

**NEW WORLD WARBLERS - Parulidae**  

**Black-lored Yellowthroat**  
1 male seen well at Tinajones reservoir and 2 seen in the middle Marañón valley.  

**Tropical Parula**  
Common.  

**Citrine Warbler**  
Fairly common at Abra Patricia and Rio Atuen.  

**Black-crested Warbler**  
Pairs seen on 3 occasions.  

**Buff-rumped Warbler**  
4 seen and several more heard  

**Grey-and-gold Warbler**  
Fairly common at Casupe and Abra Porculla.  

**Russet-crowned Warbler**  
Fairly common by voice and a few seen at Abra Patricia.  

**Three-banded Warbler**  
Common at Casupe and Abra Porculla.  

**Three-striped Warbler**  
Fairly common in eastern foothills.  

**Slate-throated Whitestart**  
Fairly common.  

**Spectacled Whitestart**  
Common in highlands.  

---

**TROUPIALS AND ALLIES - Icteridae**  

**Peruvian Meadowlark**  
Common.  

**Yellow-billed Cacique**  
2 at Abra Patricia.  

**Russet-backed Oropendola**  
Common in eastern lowlands and foothills.  

**Crested Oropendola**  
Fairly common in eastern foothills.  

**Yellow-rumped Cacique**  
Fairly common in eastern lowlands.  

**Northern Mountain Cacique**  
A flock of about 10 birds in the Rio Atuen valley.
Yellow-tailed Oriole  
Icterus mesomelas
1 at Casupe and a pair above Jaen.

White-edged Oriole  
Icterus graceannae
Common at Chaparri, a few at Casupe, Pomac and Abra Porculla.

Orange-backed Troupial  
Icterus croconotus
1 in rice fields near Rioja.

Giant Cowbird  
Molothrus oryzivorus
Several seen in eastern lowlands.

Shiny Cowbird  
Molothrus bonariensis
Common in coastal lowlands.

Scrub Blackbird  
Dives warczewiczi
A few in the coastal lowlands.

Oriole Blackbird  
Gymnomystax mexicanus
5 along to Rio Mayo.

Epaulet Oriole  
Icterus cayanensis
1 seen at Quebrada Upaquihua.

Pale-eyed Blackbird  
Agelasticus xanthopthalmus
2 seen well near Rioja.

**BANANAQUIT - Coerebidae**

Bananaquit  
Coereba flaveola
Common.

**BUNTINGS, SPARROWS AND ALLIES - Emberizidae**

Rufous-collared Sparrow  
Zonotrichia capensis
Common.

Yellow-browed Sparrow  
Ammodramus aurifrons
Fairly common in eastern lowlands.

Tumbes Sparrow - NE  
Rhynchosspiza stolzmanni
Common at Chaparri.

Orange-billed Sparrow  
Arremon aurantiirostris
1 at Arena Blanca Reserve seen well from the hide.

Black-capped Sparrow  
Arremon abeillei
2 at Abra Porculla.

Chestnut-capped Brush Finch  
Arremon brunneinucha
4 seen at Huambo and Abra Patricia.

Yellow-breasted Brush Finch  
Atlapetes latinuchus
Common in highlands. 3 subspecies seen. The nominate in the east Andes, chugurensis at Abra Barro Negro and baroni in the Cajamarca highlands.

White-winged Brush Finch  
Atlapetes leucopterus
5 at Casupe and 4 at Abra Porculla.

White-headed Brush Finch  
Atlapetes albiceps
5 at Chaparri.

Bay-crowned Brush Finch  
Atlapetes seebohmi
About 10 at Abra Porculla.

Common Bush Tanager  
Chlorospingus flavopectus
Fairly common at Abra Porculla.

Yellow-whiskered Bush Tanager  
Chlorospingus parvirostris
2 in the Rio Atuen valley.
Ashy-throated Bush Tanager  
Chlorospingus canigularis  
Fairly common at Abra Patricia.

**TANAGERS AND ALLIES - Thraupidae**

Red-capped Cardinal  
Paroaria gularis  
A few in eastern lowlands.

Black-faced Tanager  
Schistochlamys melanopis  
6 near Moyobamba.

Magpie Tanager  
Cissopis leverianus  
7 in eastern lowlands.

Black-and-white Tanager - NT  
Conothraupis speculigera  
A female seen on Cordillera Escalera.

White-capped Tanager - VU  
Sericossypha albocristata  
Heard distantly on 2 occasions at Abra Patricia.

Rufous-crested Tanager  
Creugops verticalis  
2 seen below Abra Patricia.

White-browed Hemispingus - E  
Hemispingus auricularis  
6 in the Rio Atuen valley.

Superbilled Hemispingus  
Hemispingus superciliaris  
The grey form was fairly common in Kuelap and Leymebamba areas.

Oleaginous Hemispingus  
Hemispingus frontalis  
2 at Abra Patricia.

Drab Hemispingus - NE  
Hemispingus xanthophthalmus  
1 at Abra Patricia and about 10 near Leymebamba.

Grey-hooded Bush Tanager  
Cnemoscopus rubrirostris  
8 near Abra Patricia.

Rufous-chested Tanager  
Thlypopsis ornata  
3 seen.

Buff-bellied Tanager - E  
Thlypopsis inornata  
Common in Marañón and Utcubamba valleys.

Yellow-crested Tanager  
Tachyphonus rufiventer  
1 female at Quebrada Mishquiaquillo.

White-lined Tanager  
Tachyphonus rufus  
Fairly common.

Huallaga Tanager - E  
Ramphocelus melanogaster  
Common in eastern lowlands.

Silver-beaked Tanager  
Ramphocelus carbo  
Common in eastern lowlands.

Blue-grey Tanager  
Thraupis episcopus  
Common.

Palm Tanager  
Thraupis palmarum  
Common in eastern lowlands.

Blue-capped Tanager  
Thraupis cyanoccephala  
Fairly common in humid montane forest.

Blue-and-yellow Tanager  
Thraupis bonariensis  
3 seen in Cajamarca highlands.

Vermilion Tanager  
Calochaetes coccineus  
1 near Llanteria.

Lacrimose Mountain Tanager  
Anisognathus lacrymosus  
2 at Abra Patricia.

</table>
Swallow Tanager  
*Tersina viridis*
6 seen in eastern foothills.

**Black-faced Dacnis**  
*Dacnis lineata*
5 in lowlands of San Martin.

**Blue Dacnis**  
*Dacnis cayana*
5 in lowlands of San Martin.

**Red-legged Honeycreeper**  
*Cyanerpes cyaneus*
1 at Arena Blanca Reserve.

**Purple Honeycreeper**  
*Cyanerpes caeruleus*
2 seen.

**Green Honeycreeper**  
*Chlorophanes spiza*
1 seen.

**Golden-collared Honeycreeper**  
*Iridophanes pulcherrimus*
1 female seen several times near Abra Patricia lodge.

**Cinereous Conebill**  
*Conirostrum cinereum*
1 of the *littorale* subspecies at Chaparri. Several of the nominate in the eastern Andes.

**Chestnut-vented Conebill**  
*Conirostrum speciosum*
2 above Aguas Verdes.

**Blue-backed Conebill**  
*Conirostrum sitticolor*
Several in the eastern Andes.

**Capped Conebill**  
*Conirostrum albifrons*
4 at Abra Patricia.

**Rusty Flowerpiercer**  
*Diglossa sittoides*
Fairly common.

**Moustached Flowerpiercer**  
*Diglossa mystacalis*
Several at Kuelap and Abra Barro Negro.

**Black-throated Flowerpiercer**  
*Diglossa brunneiventris*
Fairly common.

**White-sided Flowerpiercer**  
*Diglossa albilatera*
4 at Abra Patricia.

**Golden-eyed Flowerpiercer**  
*Diglossa glauca*
1 near Garcia.

**Bluish Flowerpiercer**  
*Diglossa caerulescens*
Several in eastern Andes.

**Masked Flowerpiercer**  
*Diglossa cyanea*
Several in eastern Andes.

**Peruvian Sierra Finch**  
*Phrygilus punensis*
Common near Cajamarca.

**Mourning Sierra Finch**  
*Phrygilus fruticeti*
2 near Cajamarca.

**Plumbeous Sierra Finch**  
*Phrygilus unicolor*
Several near Cajamarca.

**Ash-breasted Sierra Finch**  
*Phrygilus plebejus*
Fairly common.

**Cinereous Finch - E**  
*Piezorina cinerea*
10 in western lowlands.

**Grey-winged Inca Finch - E - VU**  
*Incaspiza ortizi*
2 seen at Hacienda Limon.

**Buff-bridled Inca Finch - E**  
*Incaspiza laeta*
6 seen in the middle Marañón valley.
Little Inca Finch - *E* - *NT*  
5 seen near Chamaya.

**Collared Warbling Finch**  
About 30 at Chaparri.

**Bright-rumped Yellow Finch**  
10 at Cumbe Mayo.

**Saffron Finch**  
Common.

**Sulphur-throated Finch**  
Hundreds in flocks at Chaparri.

**Wedge-tailed Grass Finch**  
3 near Moyobamba.

**Blue-black Grassquit**  
Fairly common.

**Variable Seedeater**  
A few near Monsefue and hundreds going to roost at Tinajones reservoir.

**Yellow-bellied Seedeater**  
2 near Jaen.

**Parrot-billed Seedeater**  
Fairly common, large flocks at Chaparri.

**Drab Seedeater**  
A few near Jaen.

**Chestnut-bellied Seedeater**  
Several in eastern lowlands.

**Chestnut-throated Seedeater**  
Several near Chaparri.

**Black-billed Seed Finch**  
2 near Rioja.

**Band-tailed Seedeater**  
10+ seen in highlands near Cajamarca.

**Plain-colored Seedeater**  
Fairly common.

**Dull-colored Grassquit**  
Fairly common in the Marañón valley.

**CARDINALS AND ALLIES - Cardinalidae**

**Tooth-billed Tanager**  
Fairly common.

**White-winged Tanager**  
3 at Llanteria.

**Olive Tanager**  
A flock of 3-4 individuals at Cerro Escalera.

**Golden Grosbeak**  
Common.

**Buff-throated Saltator**  
Several in eastern lowlands.

**Black-cowled Saltator**  
2 at Casupe and 3 at Abra Porculla.

**Golden-billed Saltator**  
Several in highlands near Cajamarca.
Streaked Saltator  
Common. 

Saltator striatipectus

MAMMALS

WOLVES, COYOTE, FOXES, JACKALS - Canidae

Sechura Fox  
Common and confiding at Chaparri. 

Pseudalopex sechurae

WEASELS, SKUNKS, OTTERS - Mustelidae

Tayra  
One seen well at Abra Patricia. 

Eira barbara

DEER - Cervidae

White-tailed Deer  
3 seen at Chaparri. 

Odocoileus virginianus

PECCARIES - Tayassuidae

Collared Peccary  
Common at Chaparri. Many including very young “piglets”. 

Pecari tajacu

MARMOSETS AND TAMARINS - Callitrichidae

Saddleback Tamarin  
About 8 near Rioja. 

Saguinus fuscicollis

NEW WORLD MONKEYS - Cebidae

Large-headed Capuchin  
3 at Tingana. 

Cebus macrocephalus

TITIS, SAKIS AND UAKARIS - Pitheciidae

San Martin Titi Monkey - E  
4 seen and others heard at Quebrada Upaquihua. 

Callicebus oenanthe

AGOUTIS - Dasyproctidae

Black Agouti  
1 seen well at Abra Patricia. 

Dasyprocta fuliginosa

SQUIRRELS - Sciuridae

Northern Amazon Red Squirrel  
1 seen by Harry at Cordillera Escalera. 

Sciurus igniventris

Guayaquil Squirrel - NE  
4 at Chaparri and Casupe. 

Sciurus stramineus

RODENTS - Rodentia

Bicoloured Porcupine  
1 seen at Tingana. 

Coendou bicolor

Montane Bamboo Rat  
Heard at Abra Patricia. 

Dactylomys peruanus
LEAF-NOSED BATS - Phyllostomidae

Spectral Bat
Vampyrum spectrum
1 flew over by the Rio Huallaga.

REPTILES & AMPHIBIANS

BOAS - BOIDAE

Boa Constrictor
Boa constrictor
1 seen well at the Oilbird ravine

TRUE TOADS - Bufonidae

Cane Toad
Rhinella marina
1 near Chaparri and several around the fish ponds at Seizo’s place near Moytobamba
