### Buru Extension I

*4<sup>th</sup> November to 9<sup>th</sup> November 2023 (6 days)*

**Black-tipped (Buru) Monarch by Glen Valentine**

*Our Buru Extension explores a beautifully forested island hosting up to 24 avian endemics including the little known Madanga!!! Other quality species include Buru Green Pigeon, Buru Mountain Pigeon, superb Buru Racket-tail, Moluccan King Parrot, Moluccan Masked Owl, Buru Thrush, Black-tipped Monarch, Buru Cuckooshrike, Buru Honeyeater and Tawny-backed Fantail among many others, and if we are very lucky, we may even find a supreme rarity such as the reputedly nocturnal Black-lored Parrot!*

**THE TOUR AT A GLANCE...****BURU EXTENSION ITINERARY**

<b>Day 1</b>	<b>Ambon and flight to Buru Island</b>
<b>Days 2, 3 &amp; 4</b>	<b>Birding Buru Island</b>
<b>Day 5</b>	<b>Birding Buru Island, flight to Ambon Island and afternoon on Haruku Island</b>
<b>Day 6</b>	<b>Ambon Island and departure</b>

**TOUR ROUTE MAP...**

## THE TOUR IN DETAIL...

**Flame-breasted (Buru) Flowerpecker by  
Glen Valentine**

**Day 1: Ambon and flight to Buru.** This afternoon we will all meet up for our flight to the seldom-birded island of Buru. After arriving in Namlea, the capital of this little-known island, we shall immediately embark on the two-hour westerly drive along Buru's northern coastline to our extremely comfortable accommodation (especially in the context of the Moluccas) situated at Waspait on the island's north-western coastline. For the next few nights this will be our base for forays southwards into the forested highlands and the remaining patches of lowland forest near Bara. Naturally we will focus our attention on the Buru endemics; species that occur here and nowhere else on our planet. We have the next four nights and three and a half full days to search for the remarkable collection of Buru's rare and endemic species, many of which have been seen by very few birders!

**Days 2, 3 & 4: Birding Buru Island.** Buru is an oval-shaped, non-volcanic island that encompasses some 8 500 sq. km. This island is the third largest of the Maluku Islands after Halmahera and Seram. Once a political prison island, Buru has until recently been very difficult to visit, especially for a birder wandering around with binoculars! Happily, all that has changed and Buru is now a fabulous destination for the

adventurous world-birder. Much of eastern Buru is relatively flat and, unfortunately, as is so often the case in the tropical lowlands, much of this area has been cleared and converted into farmland. We will therefore concentrate our attentions on the central and mountainous western half of the island where large expanses of relatively pristine montane forest still remain.

Our birding on Buru will focus on both the lowland and highland forest areas and each of these core areas support a different suite of specialties.

In the lowlands near the town of Bara, we will visit a remnant area of lowland forest where we will target such gems as the pretty Black-tipped Monarch, Buru Golden Bulbul, (Buru if split) Spangled Drongo, Black-faced Friarbird, Black-eared Oriole, South Moluccan Pitta, the scarce and shy Buru Dwarf Kingfisher (recently split from the once widespread Variable Dwarf Kingfisher) and Flame-breasted Flowerpecker. This is also one of the only known accessible areas on

**Buru Thrush by K. David Bishop**

**Buru Green Pigeon by Glen Valentine**

the island for the rare Buru Green Pigeon, which usually requires much patience, careful scanning and a fair dose of luck to find.

Here we may also find Amboyna Cuckoo-Dove, Variable Goshawk, Eastern Osprey, Black Eagle, Superb and Claret-breasted Fruit Doves, Spectacled Imperial Pigeon, Dusky Megapode (occasionally split off as Forsten's Megapode), Coconut Lorikeet, Red-cheeked Parrot, Moluccan Cuckoo, Pacific Koel, Lesser Coucal, Seram Swiftlet, Moustached Treeswift, Pale Cicadabird (a Moluccan endemic), Moluccan Flycatcher, Northern Fantail (a potential split as Buru Fantail), Black Sunbird, the regionally unique subspecies of Olive-backed (Sahul) Sunbird which is occasionally split as Black-breasted

or Clamentia's Sunbird, and Black-faced Munia. Palearctic migrants are few and far between at this time of the year but we could still turn up something interesting such as a Chinese Sparrowhawk.

During the next three days with the aid of four-wheel-drive vehicles and some rather early starts, we will venture along well-made but now disused logging track into some fine upland forest that may take us to elevations of 1 400m or higher. Here, amidst some truly lovely forest, we will search for some of the least known birds in all of Wallacea: These include Buru Mountain Pigeon, Buru Racket-tail, South Moluccan Pitta, Wakolo Myzomela (the sub-species on Buru likely to be split as Buru Myzomela), the scarce and nomadic Buru Honeyeater, White-naped Monarch, the low-density Buru Cuckooshrike, Buru and Mountain White-eyes, the dapper Tawny-backed Fantail, shy and elusive Buru Thrush, scarce Buru Dwarf Kingfisher, Island Leaf Warbler (likely to be split as Buru Leaf Warbler), Streak-breasted Jungle (Warbling) Flycatcher, unobtrusive and scarce Cinnamon-chested Flycatcher, Chestnut-backed Bush Warbler (probably a good split as Buru Grasshopper Warbler), Yellow-throated (split from Australian Golden) and Drab Whistlers and Flame-breasted Flowerpecker. During nocturnal forays we will attempt to find two rare and little-known owls – Moluccan Masked Owl and the deep-forest dwelling Buru Boobook (a very recent split of Hantu Boobook that otherwise only occurs on the neighbouring island of Seram), while other possibilities include the lovely Moluccan Scops Owl and Large-tailed Nightjar.

Buru is also known for its rarities that include the almost unknown Blue-fronted Lorikeet (seen for the first time in many years in 2014) and the mythical Black-lored Parrot (only recently observed in the wild for the first time, it is thought to be largely nocturnal). We will also make a big effort to find the Madanga – initially thought to be a white-eye of sorts but now included with the pipits

Madanga by David and Judy Smith

Pygmy Parrot, Red Lory, Eclectus, Red-cheeked and Great-billed Parrots, Moluccan King Parrot, Collared Kingfisher, Torresian Crow and Moluccan Starling.

**Day 5: Birding on Buru, flight to Ambon and afternoon on Haruku Island.** We have the early morning for further Buru birding in order to search for any species we may have missed in the or wish for better views of in the lowlands. Thereafter we will drive back to Namlea with a short stop at a small lake adjacent to the airport, which could produce new trip species such as Australasian Darter, Tricolored and occasionally Australasian Grebes, Little Black and Little Pied Cormorants, Purple Heron and Golden-headed Cisticola – with its unusual local vocabulary. Thereafter, we will board our flight back to Ambon and settle into our very comfortable hotel before embarking on a very exciting boat trip to the nearby, offshore island of Haruku where we will spend the late afternoon and early evening waiting patiently for the rare and extremely localised Moluccan Scrubfowl (Megapode) to reveal itself. After what will hopefully be a successful and thrilling outing, we will return by boat to Ambon to freshen up and enjoy a delicious dinner.

**Day 6: Ambon and departure or begin the West Papuan Islands Cruise.** Our tour of this remarkable region comes to an end this morning with our transfer to the airport, where we will connect with our departing flights from Ambon. For those continuing on the West Papuan Island Cruise, we will settle into their day rooms at our nearby hotel before meeting up with the rest of the guests to begin our explorations of Ambon.

and wagtails. This species is certainly different and may well even warrant unique family status! The Madanga was virtually unknown as a living bird until the first birding groups found it in 2016. The species has still been seen by fewer than 40 people on the planet but will be one of our primary targets.

More widespread species that we may encounter include Pacific Baza, Black Eagle, Variable Goshawk, Metallic (White-throated) Pigeon, Great Cuckoo-Dove, Common Emerald Dove, Superb, White-bibbed (Moluccan/Small Island) and Claret-breasted Fruit Doves, Little Bronze Cuckoo, the Austral-migrant Channel-billed Cuckoo, Oriental Dollarbird, Common Paradise Kingfisher, Spotted Kestrel, Red-breasted

White-naped Monarch by Glen Valentine

---

**FINANCIAL ARRANGEMENTS:**

**Tour dates, prices, single supplement rates, approximate flight costs and spaces available for this tour are displayed on our website. Please see under IMPORTANT NOTES below.**

This includes:

- All meals from dinner on day 1 to breakfast on day 6;
- Bottled or filtered drinking water;
- All hotel lodgings;
- Ground transportation;
- All activities mentioned in the itinerary;
- Reserve entrance fees;
- Local land owner fees;
- All guiding services (including tips for local guides and services.)

The tour fee does not include:

- Visa fees;
- **ANY flights** (see above);
- Any beverages;
- Camera fees;
- Special gratuities; and
- Telephone calls, laundry and other items of a personal nature.

**IMPORTANT NOTES:**

**a) Due to constantly fluctuating exchange rates, we quote our tours in 4 currencies. The tour price is however fixed only in the currency printed in bold, and the actual cost in the other currencies listed will be adjusted according to prevailing exchange rates at the time of final invoicing (usually 4 months before the tour.) The same applies to approximate flight and single supplement rates, which are also quoted in the respective fixed currency.**

**b) Rates are based upon group tariffs; if the tour does not have sufficient participants, a small party supplement will have to be charged.**

**c) Furthermore, these costs are subject to unforeseen increases in tour related costs and may have to be adjusted as a result.**

**d) Lastly, we may be forced to change or alter the itinerary and / or the designated Rockjumper leader/s at short or no notice due to unforeseen circumstances; please be aware that we will attempt to adhere as close to the original program as possible.**

**Tiping:** As noted above, gratuities (drivers, hotel staff, restaurants, ship's captain and crew etc.) are included on this tour. However, this does NOT include your Rockjumper leader/s. If, therefore, you feel that he/they have given you excellent service, it is entirely appropriate to tip them.

**Special Notes:**

- All walking will be done at a reasonable pace. If you have any physical limitations or medical conditions of any sort, please do let the Rockjumper office know in advance. The Madanga hike is the most intense, and involves a fairly steep gradient, gaining roughly 250 meters in elevation. This hike is completely optional.
- We will be birding in some remote areas well away from modern medical facilities.

- 
- Most days in the lowlands will be hot, dry and sunny, but overcast conditions are fairly frequent and some rain, heavy at times, can be expected in the afternoons. In montane areas it will range from very cool to warm. Humidity levels in the lowlands are often rather high.
  - With early starts, some long days in the field are to be expected.

**ARRIVAL & DEPARTURE DETAILS:**

This tour **does not** include **ANY** airfares. The extension will begin at Ambon Airport with a flight to Buru Island in the afternoon, and will conclude at Pattimura Airport, Ambon (IATA: AMQ) on the morning of day 6.

The above information in respect of arrivals and departures is a guide only. Precise arrival and departure information will be sent to you in your Tour Confirmation package once the tour has been officially confirmed. If you wish to arrive early and/or depart late and would like assistance in this regard, kindly contact the Rockjumper office.

**FLIGHTS:**

Jakarta and Bali are generally the main ports of entry for international flights into Indonesia. However, Sultan Hasanuddin International Airport, Makassar (IATA: UPG) is the preferred airport for connecting flights on this tour. The best route in and out of Pattimura Airport, Ambon (IATA: AMQ) are via Makassar (IATA: UPG) or Jakarta (IATA: CGK). We have the capacity to advise you on the best route according to your preferences, but your local travel agent will best be able to book these flights for you. **IMPORTANT: please DO NOT book your international flights until you have consulted the Rockjumper office for confirmation on the status of the tour.**
