Trip Report

Chimpanzee by Wayne Jones

Trip report compiled by Tour Leader, Wayne Jones

Tour Summary

Africa is blessed with an incredible range of birdlife and unrivalled megafaunal diversity. On this trip of a lifetime, we witnessed life as it once was, with thousands of mammals roaming freely across the plains of the Serengeti and Ngorongoro Crater, and Maasai still living traditional lives. In Uganda, a country renowned for its birdlife, we saw one of the world's strangest birds – the Shoebill – and observed the continent's shyest pitta quietly going about its business. And lastly, we ended our African odyssey at the drenching Victoria Falls along the fourth-longest river on the continent, the mighty Zambezi.

After a late arrival in Arusha, we got down to the business of birding the next morning, before our long drive to Ngorongoro Crater. Despite a lack of sleep and luggage woes, the birdlife in the gardens of our lodge did a good job of lifting our spirits: African Black Duck, African Green Pigeon, White-eared and Brown-breasted Barbets, Green-backed Honeybird, Black-throated Wattle-eye, Lesser and Scaly-throated Honeyguides, Retz's Helmetshrike, Grey-olive Greenbul, Trilling Cisticola and the localised Taveta Weaver.

After breakfast, we hit the road, and a couple of stops along the way yielded Pink-backed Pelican, Augur Buzzard, Yellow-collared Lovebird, Nubian Woodpecker, Chestnut Weaver, Reichenow's Seedeater and a massive Yellow-billed Stork colony. Despite being pressed for time, a walk along the Endoro Forest Trail shortly before the crater was highly productive, with species such as Crowned Eagle, Schalow's Turaco, Cinnamon-chested Bee-eater, White-tailed Blue Flycatcher, Olive-breasted Greenbul, Grey-capped Warbler, African Hill Babbler, Grey-headed Nigrita and Thick-billed Seedeater. With the afternoon light quickly turning golden, we wound our way along the crater rim to our lodge, but were happily delayed by five beautiful male Lions striding along the narrow road, just centimetres from our vehicle!

The next morning, we ventured slowly down into Ngorongoro Crater, making numerous stops along the way as we dropped from montane forest, through scrubby heathland to the grassy plains dotted with wetlands and acacia woodland on the caldera floor. Here we had our first views of Common Ostrich and over 20 Kori Bustards; while thousands of Greater and Lesser Flamingoes were turned into a big pink smear by the heat haze from Lake Magadi. Mammals included a Black Rhino, Black-backed and Golden Jackals, Spotted Hyaena, 13 more Lions, Eland and African Buffalo. Elsewhere in and around the crater, we found male

Jackson's Widowbirds displaying, Quailfinch, a vagrant male Northern Shoveler, Pangani and Rosy-throated Longclaws, Speke's Weaver, Golden-winged, Malachite, Bronzy and Eastern Double-collared Sunbirds, Kenrick's Starling, Northern Pied Babbler, Dusky Turtle Dove, Grey Crowned Crane and Black-chested Snake Eagle.

colored Boubou, Taita Fiscal, Rufous Chatterer, White-browed Scrub Robin, Kenya Sparrow, a stunning male Black Bishop and, nearby, a Short-tailed Lark.

While rounding a corner along the crater rim the following day, we caught a glimpse of a Leopard slinking off the road into the bush. We pulled up alongside and managed to relocate the cat, which was staring at us from behind some leaves only metres away. *Not a bad start to the day!* We continued westward, to Serengeti National Park, with the landscape becoming increasingly arid as we moved into Ngorongoro's rain shadow. We visited a Maasai village and the world-famous palaeontological site: Oldupai Gorge, where we took in a lecture covering its history and perused the small museum. Bird-wise, we saw Southern Grosbeak-Canary, Eastern Chanting Goshawk, Red-and-yellow Barbet, Chinspot Batis, Slate-

That afternoon, we added Black-bellied Bustard, Spotted Thick-knee, Black-winged Lapwing, Yellow-throated Sandgrouse, Jacobin and Diederik Cuckoos in the same little shrub, Black-lored Babbler, Yellow-billed Oxpecker and Red-headed Weaver to our lists as we covered the terrain from the Serengeti entrance to our lodge. We spent the next two full days exploring the southern, central and western sections of this huge World Heritage Site. The wildebeest migration was in full swing, with thousands of animals to the west of the park's capital, Seronera. We even witnessed a large pride of Lions attempting a hunt among them. We spent a tense few minutes observing the silent strategising among the lionesses, but in the end the wildebeest lived to roam the plains another day.

Other highlights included African Elephant, heaps of Hippo, Kirk's Dik-dik, Giraffe, Topi, White-tailed Lark, Secretarybird, Ruppell's and Lappet-faced Vultures, Grey-crested Helmetshrikes on two occasions, Fischer's Lovebird, White-bellied Bustard, Temminck's Courser, Tanzanian Red-billed and Von der Decken's Hornbills, the *usambiro* subspecies of D'Arnaud's Barbet, Long-tailed Cisticola, range-restricted Karamoja Apalis, Straw-tailed Whydah and Grey-breasted Spurfowl.

Leaving behind one of the continent's most iconic parks, we returned to our lodge near Arusha, where we notched up Green Malkoha,

Tambourine Dove and Stripe-faced Greenbul, before flying to Entebbe early the next morning. We eased into Ugandan birding with a visit to the Entebbe Botanical Gardens, which produced great birds like African Openbill, Palm-nut Vulture, Ross's and Great Blue Turacos, Woodland Kingfisher, Grey Parrot, Yellow-throated Leaflove, Snowy-crowned Robin-Chat and Orange Weaver. At a hotel a few blocks away, we enjoyed cracking views of a pair of African Hobbies.

During a day trip to the Mabamba Swamp, we boarded a small motorboat and headed down a papyrus-lined channel in search of one of the world's strangest looking birds. Our local guide spied the large grey bird rather quickly, and we slowly edged closer to the Shoebill. Other denizens of Mabamba included Lesser Moorhen, Long-toed Lapwing, Weyn's Weaver, Lesser Jacana, Blue-headed Coucal, Yellow-throated Longclaw, Swamp Warbler and the dazzling Papyrus Gonolek. A tiny patch of forest in the vicinity held Black-and-white-casqued Hornbill, Red-chested Cuckoo, Yellow-rumped Tinkerbird, Red-shouldered Cuckooshrike and Superb Sunbird

Shoebill by Wayne Jones

From Entebbe, we embarked on the long drive through countless villages – where roadside birds included Piapiac and African Pied Hornbill – to Kibale National Park. A highly productive stop along our route afforded us good looks at Blue-spotted Emerald Dove, spectacular Double-toothed Barbet, a pair of Black-and-white Shrike-Flycatchers, African Blue Flycatcher, White-headed Saw-wing, Compact Weaver, Yellow-bellied and Black-crowned Waxbills, Black-and-white Mannikin and Brimstone Canary. We reached Kibale in the late afternoon, where we birded for a short while – Black Bee-eater, Grey-throated and Hairy-breasted Barbets, Speckled and Yellow-throated Tinkerbirds, Purple-headed Starling, Sooty and Cassin's Flycatcher were some of the species seen before settling into our lodge situated right in the park.

Green-breasted Pitta by Wayne Jones

The next morning saw us stumbling through the forest pre-dawn to ensure we were in position at just the right time to find a very special bird: Green-breasted Pitta. As the morning's grey light filtered through the forest canopy, our local guide called us to say he'd found the bird. We quietly hurried to the spot and watched, enthralled, as the gorgeous creature moved through the leaf litter along the path. To top it off, a second bird moved in and we had simply sensational views of the two relaxed individuals going about their business. With that firmly in the bag, we set off after our other major quarry – Chimpanzee! Thanks to teamwork from the other guides present in the forest, this didn't take long, and we soon came

upon a male chimp lounging in the middle of a small circle of spectators with a few more preparing nests for themselves up in the trees.

Blue-breasted Bluebill by Wayne Jones

some great birds: African Pygmy Kingfisher, Yellow-billed Barbet, Western Nicator, Little and Plain Greenbuls, Moustached Grass Warbler, Dusky-blue Flycatcher, Green-headed Sunbird, Red-headed Malimbe and the exquisite Red-headed Bluebill. After this, it was another long drive to Buhoma, on the edge of Bwindi Impenetrable Forest. The journey took us through Queen Elizabeth Park, which lies on Uganda's border with the DRC. The open acacia woodland and grassland here held a new suite of birds for us that included Red-necked Spurfowl, Blue-naped Mousebird, Common Scimitarbill, White-headed Barbet, Brown-throated Wattle-eye, Stout Cisticola and Sooty Chat. We also had our only sighting of Kob and our second look at Bohor Reedbuck. While crossing the Kazinga Channel, which links Lakes Edward and George, we counted 33 Pied Kingfishers along the utility wire spanning the narrow water body! *Evidently a very fishy spot!!*

The following two days were spent in bliss at our tranquil lodge on the edge of Bwindi Impenetrable Forest National Park. The major attraction was, of course, the Eastern Gorillas, of which we had two sightings – the first brief and unofficial, the second properly sanctioned and, by all accounts, a magical and intimate experience. The birding was equally sensational, with sightings of Black-billed Turaco, Dusky Long-tailed Cuckoo, a male Bar-tailed Trogon, Yellow-spotted Barbet, Buff-spotted and Elliot's Woodpeckers, a charming little African Broadbill, Pink-footed Puffback, Black-throated Apalis, Kakamega, Ansorge's, Cabanis's and Red-tailed Greenbuls, Petit's Cuckooshrike, Luder's Bushshrike, Chubb's Cisticola, a pair of nest-building Black-faced Rufous Warblers, Olive-green Camaroptera, Stuhlmann's Starling, Grey-throated Tit-Flycatcher, Grey-chinned and Blue-throated Brown Sunbirds, Black-billed and Brown-throated Weavers, Red-throated Alethe, White-bellied Robin-Chat and Equatorial Akalat.

Equatorial Akalat by Wayne Jones

Our last birding stop in Uganda was at the dry, acacia-dominated Lake Mburo National Park. Shortly before entering the park, we came upon a herd of magnificent Ankole Cattle and marvelled at their improbably long, robust horns. Unfortunately, we couldn't find the area's flagship bird species, the Red-faced Barbet, but were consoled with Crested Francolin, Levallant's Cuckoo, Spot-flanked and

African Finfoot by Wayne Jones

Crested Barbets, Brown-backed Honeybird, White-winged Black Tit, Violet-backed Starling, Yellow-billed Oxpecker and Brown-backed Scrub Robin. We also encountered Plains Zebra, Tantalus Monkey, Olive Baboon, Impala, Topi, Common Dwarf Mongoose, Waterbuck, African Buffalo and (Rothschild's) Giraffe. Before departing for an overnight stay in Entebbe, we ventured out on to the lake, nervously skirting pods of Hippos in pursuit of our main target – African Finfoot, of which we saw a pair incredibly well. A spot of roadside birding along the way yielded Greater Swamp Warbler, Carruthers's Cisticola and MacKinnon's Shrike.

The next day, we flew from Entebbe to the town of Victoria Falls in Zimbabwe. We quickly made our way to the attraction for which the town is named – *we'd already seen it from the air and were eager to experience it up close*. The falls were very nearly at their peak flow, and their local name of Mosi-oa-Tunya (the Smoke that Thunders) suddenly made a lot of sense! *Perhaps it should be altered to "the WET Smoke that Thunders" as we were drenched in localised showers caused by the massive amounts of spray and erratic updraughts*. The warm sunshine dried us off while we walked from the falls to the bus and we quickly passed through Zambian border control before heading to our lodge on the banks of the Zambezi River.

Over the last couple of days of the tour, we wound things down a bit and enjoyed the sumptuous food and personalised accommodation at our lodge – *while still fitting in some birding, of course!* A boat ride on the Zambezi afforded us views of White-crowned Lapwing and we spotted Collared Palm Thrush, Holub's Golden Weaver, African Golden Oriole, African Harrier-Hawk, Trumpeter Hornbill and Black-collared Barbet in the lodge grounds.

Dickinson's Kestrel by Wayne Jones

The Livingstone sewage works and nearby Mosi-oa-Tunya National Park gave us looks at Dickinson's Kestrel, African Pygmy Goose, Shikra, African Swamphen, Long-toed Lapwing, Senegal Coucal, a pair of Black Cuckooshrikes, Yellow-bellied Greenbul, Southern Red-billed Hornbill, Southern Black Tit, Red-billed Oxpecker, White-browed Sparrow-Weaver and Blue Waxbill. While in the national park, the guests went on a short guided walk to see the carefully guarded resident White Rhino, and we also added a male Puku to our list. In Livingstone, we paid another visit to

Victoria Falls – the *Zambian side offering a (slightly) drier perspective* – and browsed the town’s craft market for some hand-made gifts for the folks back home. All in all, a wonderful end to a tour of some of Africa’s most amazing sites (*and sights!*).
