Tour Summary

After all meeting up in our comfortable hotel in the capital, Manila – Luzon, we discussed our plans for the coming days over a delicious buffet dinner, before settling down for a good night's sleep. This year's remarkable Philippines adventure started off with a visit to the island of Palawan.

In the early hours of the following day, we travelled to the airport for our flight to Palawan. We arrived in time to do some birding en route to our hotel. It was a nice overcast morning and this kept the bird activity high. In quick succession, we notched up a fabulous Black-chinned Fruit Dove, Green Imperial Pigeon, a pair of Oriental Dwarf Kingfisher of the rufous-backed form, huge White-bellied Woodpecker, Blue-naped Parrot, Blue Paradise Flycatcher seen nesting, Pin-striped Tit-Babbler, White-vented Shama, elusive Palawan Flycatcher and Brown-throated and Lovely Sunbirds. At a nearby site, we were delighted to find the stunning Palawan Peacock-Pheasant and Nankeen Night Heron.

After a delicious lunch at a Vietnamese Restaurant, we continued to our very comfortable hotel in Sabang. In the afternoon, we explored some nearby forest patches and enjoyed good views of Philippine Cuckoo-Dove, Ashy Drongo, Slender-billed Crow, Plaintive Cuckoo and the highly sought-after Red-vented Cockatoo. Some night birding yielded Palawan Scops Owl, Palawan Frogmouth and Large-tailed Nightjar. We celebrated a great day's birding over drinks at dinner.

Palawan Peacock-Pheasant by David Hoddinott

The next morning, we explored the fabulous St Paul's National Park. A short boat ride brought us to the park, where we sought out Philippine Megapode which gave superb views. Other species seen here included Chestnut-breasted Malkoha, smart Ruddy Kingfisher, Oriental Hobby hunting swiftlets at the entrance to the underground river, lovely Hooded Pitta, Asian Fairy-bluebird and endemic Ashy-headed Babbler and Palawan Blue Flycatcher. After some great birding, we set off on the underground river boat trip, which was most interesting as we observed the quaint limestone formations and the echo-locating Germain's Swiftlet.

In the mid-afternoon heat, we had time for a dip in the ocean or some relaxation around our lodge. We then explored a nearby forest patch which produced some great birds. These included Thick-billed Green Pigeon, Square-tailed Drongo-Cuckoo, Blue-eared Kingfisher, Spot-throated and Red-headed

Flamebacks, Blue-headed Racket-tail, Common Iora, Bar-bellied Cuckooshrike, Common Hill Myna, Yellow-throated Leafbird and Palawan Flowerpecker. During our night birding, we found a splendid Palawan Flying Squirrel.

The following morning, we worked the trails of some nearby forest and most of us managed to see the elusive Falcated Wren-Babbler. Melodious Babbler put on a good show, as did a splendid family group of the sought-after Great Slaty Woodpecker. In the afternoon, we found a Stork-billed Kingfisher and Copper-throated Sunbird at some mangroves. We then departed on a boat trip to a nearby islet where, after some effort, we enjoyed great views of Mantanani Scops Owl.

Palawan Hornbill by David Hoddinott

The next day, we had time for morning birding en route to the airport for our afternoon flight to Manila. What a morning it turned out to be, as we enjoyed great views of the tricky and handsome Palawan Hornbill, a Philippine Pitta showed well, Fiery Minivet, Dark-throated Oriole, Palawan Tit, Black-headed, Ashy-fronted, Palawan and Sulphur-bellied Bulbuls, Rufous-tailed Tailorbird, Pale Spiderhunter and Scaly-breasted Munia. The star find, however, was a pair of Spotted Wood Owl at a day roost!

Leaving Palawan, we travelled to Mindanao and Mt Kitinglad. We used local Jeepney transport for the last part of the journey, and then proceeded on the two-hour hike to camp. En route we added Black-winged Kite, Philippine Coucal and a splendid White-eared Brown Dove. Our tents this year had been

covered with an outside roof, which made it so much more comfortable in the rain. We enjoyed delicious home cooked meals by our local guide's family, in the main lodge building. In a place with no electricity, it was a great surprise to have cold beers at night.

Our two full days on the mountain were spent walking the forest trails and spending a good deal of time at a lookout for the great Philippine Eagle. It wasn't until our last afternoon that we finally managed to see it. The wait was worthwhile, though, as we had a superb experience of a pair displaying and even locking talons in mid-air and tumbling

for a short while. They also perched up in some tall trees so that we could scope them. Other species seen during our time here included Crested Honey Buzzard, Philippine Serpent Eagle, Rufous-bellied Eagle, Crested Goshawk, Plain Bush-hen, splendid Bukidnon Woodcock at dusk, White-eared Brown Dove, magnificent Yellow-breasted Fruit Dove, Oriental Cuckoo, Philippine Frogmouth, Philippine Nightjar, Ridgetop and Philippine Swiftlets, Mindanao Hornbill, Philippine Pygmy Woodpecker, Buff-spotted

Flameback, flocks of Mindanao Racket-tail, Philippine Hanging Parrot, Scarlet Minivet, McGregor's Cuckooshrike, Black-and-cinnamon Fantail, Elegant Tit, Philippine Bulbul, Rufous-headed Tailorbird, Negros Leaf Warbler, Long-tailed Bush Warbler, Tawny and Striated Grassbirds, Warbling White-eye, Sulphur-billed Nuthatch, Short-tailed Starling, Apo Myna, Stripe-breasted Rhabdornis, Turquoise Flycatcher, White-browed Shortwing, Bundok Flycatcher, Buzzing and Fire-breasted Flowerpeckers, Grey-hooded and Apo Sunbirds, Cinnamon Ibon and White-cheeked Bullfinch.

From Mount Kitinglad, we made our way to Davao for the night. En route we enjoyed sightings of Oriental Pratincole. In the late afternoon, we scored with good views of Southern Silvery Kingfisher and Orange-tufted Spiderhunter near our accommodation. The following morning, we found the sought-after Cryptic Flycatcher and Whiskered Flowerpecker.

From Davao, we made our way to PICOP. En route we stopped at some mudflats where we found Chinese Egret, two Lesser Frigatebirds, White-bellied Sea Eagle and Pied Stilt. We continued on to Bislig and checked into our accommodation before visiting the Bislig airport. In the late afternoon, we found Wandering Whistling Duck, splendid King Quail, Watercock, Little Ringed Plover and a distant Eastern Grass Owl.

Our next three full days were spent in the PICOP area. Exploring the roads and forest patches, we scored with many endemics and a great number of species. Highlights included Philippine Honey Buzzard, Pinsker's Hawk-Eagle, Amethyst Brown Dove, Philippine Green Pigeon, Pink-bellied Imperial Pigeon, Black-faced Coucal, Violet Cuckoo, Philippine Drongo-Cuckoo, Great Eared Nightjar, Pygmy and Ameline Swiftlet, Philippine Spine-tailed Swift, Purple Needletail, Philippine Trogon, Rufous and Writhed Hornbills, Philippine Falconet, Blue-crowned Racket-tail, Azure-breasted Pitta collecting worms to feed young, Black-bibbed Cicadabird, Yellow-bellied Whistler, Mindanao Blue Fantail, Short-crested Monarch, Rufous Paradise Flycatcher, Yellow-wattled and Yellowish Bulbuls, Rufous-fronted and Black-headed Tailorbirds, Mindanao Pygmy Babbler, Rusty-crowned Babbler, Everett's White-eye, Stripe-headed Rhabdornis, Philippine Magpie-Robin, Rufous-tailed Jungle Flycatcher, Little Slaty Flycatcher, Philippine Leafbird, Olive-backed Flowerpecker, Metallic-winged, Handsome and Grey-throated Sunbirds and Naked-faced Spiderhunter. On one of the afternoons, we visited a lake where we added Philippine Duck, Yellow, Cinnamon and Black Bitterns, Javan Pond Heron and Western Osprey.

Philippine Trogon by David Hoddinott

Lina's Sunbird by David Hoddinott

Leaving PICOP, we made an early morning visit to CompVal. It worked out great and we added Mindanao White-eye, Olive-capped and Flame-crowned Flowerpecker, Lina's Sunbird – a Rockjumper lifer, Island Thrush, Philippine Oriole and McGregor's Cuckooshrike. Thereafter, we made our way to Davao, where we connected with our flight to Luzon. Our flight was delayed so we opted to have a quick dinner at the Manila airport before making our way to Mt Makiling, where we immediately checked into our hotel and went to sleep.

The following morning, we enjoyed time exploring the forest of Mt Makiling. Here, we found Philippine Hawk-Eagle, Philippine Hawk-Cuckoo, Spotted Wood Kingfisher, Luzon Hornbill, Balicassiao, Grey-backed Tailorbird and Stripe-headed Rhabdornis. In the afternoon, we visited the Botanical Gardens where, after a good search, we found the stunning Indigo-banded Kingfisher.

In the evening, we located a superb Luzon Hawk-Owl that gave great views.

The following morning, we were awoken by the excited shrieks of joy from our local guide who had located a magnificent Philippine Eagle-Owl! We all got ready in quick time and, to our amazement, the bird was still there, and we all enjoyed an amazing encounter with this seldom seen species (see photo above). We then travelled up the road for a final bit of birding on Mt Makiling, where we enjoyed great views of both Scale-feathered and Rough-crested Malkohas.

Philippine Eagle-Owl by David Hoddinott

From Mt Makiling, we travelled to Quezon. En route we stopped off at La Mesa Ecopark, where we enjoyed good views of Lowland White-eye, and then magnificent views of several Ashy Thrush and yet another superb Hooded Pitta. Continuing to our lunch spot, we stopped at some rice fields which yielded Barred Rail, White-browed Crake and White-breasted Waterhen. Our time in Quezon was spent birding a forested road, where we found a fabulous selection of sought-after species. These included Cream-

Flame-templed Babbler by David Hoddinott

breasted Fruit Dove, amazing Whiskered Pitta thanks to Herculean efforts by our local guide, Blue-headed Fantail, Citrine Canary-Flycatcher, Bicol Ground Warbler calling tantalisingly close-by, Yellowish, White-eye, Philippine Fairy-bluebird, Bicolored and Orange-bellied Flowerpeckers and Flaming Sunbird.

From Quezon, we travelled to Subic. At a wetland en route, we enjoyed good scope views of Greater Painted-snipe and Pheasant-tailed Jacana in full breeding plumage. We enjoyed two nights at a comfortable hotel.

Our first morning was very hot and humid, and there was very little bird activity. Thankfully, the afternoon was quite the opposite, and there were birds everywhere. So, with almost two full days in the Subic forests, we had time to explore the forested roads. Here, we found a good selection of species including wild Red Junglefowl, Black-naped Tern – a nice surprise in the bay, Rufous Coucal, Chocolate Boobook – which took some effort but showed well in the end, Blue-throated Bee-eaters at a nesting colony, many Luzon Hornbill, Luzon Flameback, superb Sooty Woodpecker, Green Racket-tail perched, Blackish Cuckooshrike, Coletto, White-browed Shama – finally a confiding individual showed well, and Trilling Tailorbird.

Leaving Subic, we travelled back to Manila in order for those heading home to connect with their International flights and for the rest of us to catch our flight to Bacolod - Negros, for the start of the extension.

Visayan Broadbill by David Hoddinott

We departed early the following morning for the drive to Mt Kanlaon. We enjoyed a pleasant day in the forest, where we netted some great endemics, including the unique Flame-templed Babbler which put on a great show. Other species included White-vented Whistler, Visayan Fantail, Visayan Bulbul and Philippine Tailorbird. In the late afternoon, we spent time on the lower slopes where we netted the stunning Dimorphic Dwarf Kingfisher, Black-belted Flowerpecker and Magnificent Sunbird.

Philippine Frogmouth by David Hoddinott

The next day, we took an early flight to Cebu. We birded a forest fragment near Tabunan, where we located several Black Shama, Mangrove Blue Flycatcher, the tricky Streak-breasted Bulbul and a superb Cebu Hawk-Owl.

From Cebu, we took the ferry to Bohol, where we enjoyed time in Rajah Sikatuna National Park and the surrounding area. Highlights during our stay included Philippine Duck – a pair seen flying over a forested stream, Black-faced Coucal, Everett's Scops Owl at a day roost, cryptic Philippine Frogmouth, Philippine Trogon, Winchell's Kingfisher, stunning Northern Silvery Kingfisher, Samar Hornbill, Buff-

spotted Flameback, Visayan Broadbill – amazing sightings of a pair and, later, a family group of three, Azure-breasted Pitta, Visayan Blue Fantail, Striated Swallow, Yellow-breasted Tailorbird, Striated Wren-Babbler and Bohol Sunbird. On our final morning, we lucked out with a splendid Mindanao Bleeding-heart. How lucky can one get!!!

And so ended this fabulous trip. We travelled to Tagbilaran to catch our flights back to Manila in order to catch our International flights home. Thanks must go to wonderful, enthusiastic and fun participants, great site guides, as well as a superb ground operations team. We hope to see you on another fabulous adventure soon!
